About the project

We are looking for .NET Developers to join our Digital Competency Center. It is a department in which we implement solutions tailored to business needs. Projects are in the field of providing web and mobile applications to external clients, mainly foreign. We act in various business domains from insurance, through industry, IoT, energetics, and e-commerce to finance services.

We are expanding teams that will build online payment engines for one of the global Payment Service Providers in the fintech market. Our applications process 2,5 billion transactions for companies from 50 different countries. We run projects in agile methodologies, working with CI/CD approach and microservices architecture.

Your responsibilities

Collaborating with all stakeholders from product definition to running in production in a DevOps collaborative mindset

Being part of a Scrum team and participating actively in all its rituals

Taking an active part in peer-working sessions

Creating innovative % high-quality technical solutions and architecture that will be delivered through Scrum iterations

Solving complex software development/design issues, and responding to new demands, priorities, and challenges

Taking a multifaceted approach to design to understand applications from all levels, from the big picture enterprise-level view to the low-level technical view

Our requirements

At least 5 years of working experience in .NET projects

Through knowledge of tooling suite & environment: Visual Studio or Rider, Git, Confluence, Jira, ReSharper, NCrunch

Good understanding of CI/CD and experience with Azure DevOps, BitBucket, Bamboo, Terraform, Puppet, Octopus

Experience with microservices architecture

Good understanding of clean code principles

Excellent English skills, both written and spoken
