ADAS: Feature Owner for Basic SW

Apply Now

Company: Spyrosoft

Location: Poland

Category: other-general

Requirements

Automotive Management ADAS Autosar Embedded systems Requirements management Organizational skills Analytical skills Communication skills Agility English B2

Job description

As a Feature Owner you are the technical lead and coordinator of one or more system features. You provide the feature planning and detailed planning of your team's activities. You are responsible for the appropriate development of a feature throughout the entire life-cycle, from concept to production, in time with the project constraints.

Coordinate the feature/function definition, development and release according to the master project plan, from System Requirement to System Test and release, including bug fixing phase till SOP (Start Of Production)

Perform regular meetings with all interface partners (e.g., interfacing functions, interfacing ECUs) and clarify all requirements

Coordinate feature-based requirements engineering: ensuring the correct allocation and the review of system requirements. Collaborate to refine the requirements and supervise the development of the technical specification

Analyze, plan, estimate and track activities within your feature team

Ensure the correct supplier management for the supplied work products from internal and external suppliers

Coordinate the feature development within hardware and software teams and ensure the development process is applied according to the Company standards

Project description

Join us and become a crucial part in taking ADAS to the next level! Together with our strategic partner, a global leading Tier 1 automotive supplier, we are approaching amazing solutions that will bring unique value to top car manufacturers. Let's do it together!

Our requirements

5+ years of relevant work experience in technical and management roles

At least Bachelor's Degree in Engineering or related field

Very good knowledge of the automotive environment and development processes in the automotive industry

Experience in at least one project in development of ADAS systems

Good knowledge in base software incl. Autosar

Experience in at least one project developing embedded systems

Experience working in customer and supplier facing roles

Good organization, teamwork and project management skills

Very good knowledge of requirements management

Very good analytical skills

Very good communication skills

Willingness to work in Agile teams

Good English language skills are mandatory; German is an added advantage

MS Office package (especially Excel)

Awareness of analysis and engineering tools such as version control/configuration management, UML tools, static code check tools

ALM tools (PTC Integrity)

Desirable: development tools such as CANalyzer, CANoe, CANape, neoVI, ADTF environment, Carmaker, Enterprise Architect

About Spyrosoft

Spyrosoft is an authentic, cutting-edge software engineering company, established in 2016. In 2021 and 2022, we were among the fastest growing technology companies in Europe, according to the Financial Times. We were founded by a group of tech experts with established backgrounds in software engineering, who created an 'engineer-to-engineer' workplace, powered by enthusiasm, fairness and authentic relationships. Having a unique offering, which bridge the gap between technology and business, we specialise in technology solutions for industry 4.0, automotive, geospatial, healthcare & life sciences, employee experience & education and financial services industries.
