**AI Test Development Engineer**

**Apply Now**

Company: Intel Corporation

Location: Gdańsk

Category: architecture-and-engineering

**Job Description**

**Habana Labs** is a group at Intel that focuses on developing disruptive solutions that will shape the future of AI and Deep Learning computing.

In this position you will work with an experienced software engineering team on developing software solutions integrating our proprietary software stack for hardware deep learning accelerators with the most popular deep learning frameworks.

We are looking for a dynamic and motivated engineer who loves to lead others to join our team.

**Our Engineer:**

Works with internal engineering teams and external partners, customers, and ISVs to deliver optimized AI solutions using Intel products with the goal of driving adoption of Intel products.

Researches technical trends and utilizes deep domain and market segment expertise to prototype solutions and develop AI software including open source libraries and models.

Optimizes performance of AI models through deep knowledge and expertise of AI frameworks, algorithms, models, and related hardware.

Researches, develops, and adjusts new or existing AI models, code, parameters, and/or

quantization to address issues and modify operations to enhance performance.

Partners with AI algorithm and framework engineers as needed to optimize endtoend AI models to Intel hardware features.

Serves as a trusted technical advisor and provides technical enabling.

Partners with Intel software and hardware product development teams to accelerate and optimize future products in AI and HPC domains by leading application preenabling and product hardening.

Delivers competitive and differentiated benchmark collateral and identify and drive key workloads into product requirements and architect innovative projection methodologies and tools.

**Qualifications**

Problem-solving skills a can-do attitude and a strong sense of ownership of product quality are the key in this role.

The role in our QA team extends to software engineering so the candidate is required to demonstrate experience in professional Python programming, C/C++ experience is an additional advantage.

AI neural networks knowledge would be a turbo boost for applying candidates.

Experience with Linux from the user perspective and Bash scripting

Experience with virtualized environments and dockers.

Ability to plan and maintain test suites for continuous integration and related processes using Jenkins.

Experience in working closely with development and DevOps teams excellent communication skills.

Fluency in English.

Below, a sneak peek of what you can expect inside Intel:

You will be working across a group of professionals.

We guarantee you will be working in a safe environment, in an organization which profoundly understands the current health situation worldwide. Either at your own home, or in our premises if needed, the security and well-being of you and your family stands as our utmost responsibility.

You will have constant opportunities to develop your professional career through technical and soft skills trainings, taking part in innovation projects or rotational programs.

Also flexible working hours are important for us.

Amazing Benefits to make life easier and more enjoyable are waiting for you: Stock Program, Annual Bonuses, Employee Pension Plan, Medical Plan and life insurance for you and your Family, Peer to peer recognition, Multisport Card / Holiday card, Groups of enthusiasts, Ticket restaurant card, Exclusive employee discounts, (online) events and many more.

At Intel, employees share in successes, enjoy comprehensive rewards, and are inspired by an innovative and inclusive workplace.

What can you expect when there is a match between us?

High level of visibility, credibility, and empowerment you can take for granted.

You will own and drive several projects and initiatives, run on various organizational levels.

When you come to work at Intel, you come to work in a collaborative, supportive environment, where your equally brilliant colleagues will push you to be your best. There's no fear of failure-we know that's how innovation happens. And you'll never be bored.
