

## **Analytics & Automation Quality Assurance Tester**

[Apply Now](#)

Company: PL18 Alcon Polska Sp. z o.o. Company

Location: Warsaw

Category: computer-and-mathematical

Analytics & Automation QA Tester will be responsible to ensure quality of the various solutions during the development and deployment. He/she will work closely with the 2 POs and their teams as well as with the INT Test and Release Manager to determine the sprint scope and requirements. He/she will design test cases and conduct manual tests to ensure the changes/enhancements implemented by developers fit for purpose and any bugs or issues are identified early and removed before it gets deployed to everyday users.

### **Major accountabilities**

Reviewing requirements and preparing test cases

Participating in the Demo sessions and interacting with the developers to understand the requirements

Executing manual tests

Analyzing and documenting test results on errors or bugs, and usability.

Providing assistance with troubleshooting issues

Preparing reports on all aspects related to the testing carried out and reporting to the A&A teams and INT Test and Release Manager

### **Background**

Education: University degree in computer science or related field

Languages: English required

### **Experience and skills :**

3-5 years experience as a QA Tester or similar role preferred

Familiar with Agile framework

Previous experience working with Salesforce.com in particular CRM A

Working knowledge of test techniques and test management software (e.g. qTest)

Knowledge of development tools such as Copado is an advantage

Excellent communication skills

Excellent time management

Excellent documentation skills

Good organizational skills and detail-oriented mindset
