Company: ITL Poland

Location: Kraków

Category: business-and-financial-operations

Job description Infosys– ENG IOTCORE – Lead Consultant – Poland– Manufacturing Execution System - Lead Consultant for Delmia AprisoAt Infosys, we pioneered and perfected the global delivery model, introducing to our customers the ability to move technology work to different locations where talent is readily available and quality is both impeccable and cost competitive. Over the years we have applied this model to a full range of services - both technical and business. Our IT services such as application integration, testing, maintenance and infrastructure management ensure your operations are fully optimized. Our business process outsourcing and management services, such as customer service delivery, human resource outsourcing and procurement handling, drive down process costs while greatly enhancing their efficiencies. Most importantly, as part of our strategic sourcing approach, these services free up resources that can then be deployed to drive transformation and innovation initiatives.

**Wanted: Global Innovators To Help Us Build Tomorrow's Enterprise**

As a Lead Consultant, you will be an expert contributing to different phases of the consulting lifecycle. You will be part of Client technical leadership team working as Solution Architect. You will be intensely involved in business process consulting; you will define the problem, propose solution, review developed solution, suggest required changes based on actual requirement and developed solution. You will be analyzing solution to make sure it meets clients current and future requirements. Work with WMS team to build correct integration between Apriso and WMS, provide standardized solution to meet client requirements. You will have the opportunity to shape value-adding consulting solutions that enable our clients to meet the changing needs of the global landscape. Could be remote

work. This position may require 25% travel. QualificationsBasicExperience in Manufacturing IT application and expertise in the area of Industrial Automation and Manufacturing Execution SystemsPreferredExperience in technology consulting, enterprise and solutions architecture and architectural frameworksExperience in Delmia Apriso Skills, integration with shop floor systems and ERP, PLM/other applications, and should have implemented at least 3-4 projects with role involving solution designing and architecture for Delmia AprisoExperience in defining new architectures and driving an independent project from an architectural stand point.Experience in defining technology solutions for Discrete Manufacturing domain to solve business/ IT problem.About UsInfosys is a leading provider of next-generation consulting, technology and outsourcing solutions. We are dedicated to helping organizations; build tomorrow's enterprise and advance the way the world works. That's why Forbes ranks us 19th among the top most innovative companies. Our employees partner with clients to transform their business - one conversation; one idea; one insight at a time. While we are at it, some things remain unchanged: the unwavering ethics, transparency and respect behind everything we do. We will always be a company powered by intellect and driven by values. So, if your passion is to build solutions that really make a difference to enterprises, the community and your world, Infosys is the right place for you.
