Job Description

Infosys– ENG IOTCORE –LeadConsultant– Poland– Manufacturing Execution System - Lead Consultant for Delmia Apriso

At Infosys, we pioneered and perfected the global delivery model, introducing to our customers the ability to move technology work to different locations where talent is readily available and quality is both impeccable and cost competitive. Over the years we have applied this model to a full range of services - both technical and business. Our IT services such as application integration, testing, maintenance and infrastructure management ensure your operations are fully optimized. Our business process outsourcing and management services, such as customer service delivery, human resource outsourcing and procurement handling, drive down process costs while greatly enhancing their efficiencies. Most importantly, as part of our strategic sourcing approach, these services free up resources that can then be deployed to drive transformation and innovation initiatives.

Wanted: Global Innovators To Help Us Build Tomorrow's Enterprise

As a Lead Consultant, you will be an expert contributing to different phases of the consulting lifecycle. You will be part of Client technical leadership team working as Solution Architect.

You will be intensely involved in business process consulting; you will define the problem, propose solution, review developed solution, suggest required changes based on actual requirement and developed solution. You will be analyzing solution to make sure it meets clients current and future requirements. Work with WMS team to build correct integration between Apriso and WMS, provide standardized solution to meet client requirements. You will have the opportunity to shape value-adding consulting solutions that enable our clients to meet the changing needs of the global landscape.

Could be remote work. This position may require 25% travel.
