

## Associate Product Manager (Product Owner) - Recommendation

[Apply Now](#)

Company: GPC Global Technology Center

Location: Kraków

Category: other-general

### Position Purpose

The Associate Product Manager is responsible for assessing business needs and working with cross-functional product teams to find the fastest way to achieve value around those needs. The role focuses on delivering business value to drive sales, improve efficiency, and improve customer satisfaction through the production of quality products. Within their designated enterprise product line, Associate Product Managers work closely with teams of developers, designers, and business partners.

### Responsibilities

Develop deep knowledge of business processes for the E-Commerce/Discovery domain (Experience with Recommendation Systems is desirable).

Document requirements (functional and non-functional) via epics and user stories.

Drive prioritization of epics and user stories.

Assist the Product Manager in driving collaboration and cross-domain prioritization and sequencing of activities.

Manage stakeholder expectations to ensure scoping, backlog, and delivery aligns with product strategy.

Track KPIs to measure relevant business goals for the domain.

Represent business throughout the technology development process.

Track releases and communicate delivery roadmap.

Work with agile practitioners and engineering to improve the overall delivery lifecycle.

Plan and conduct user showcases and acceptance testing.

Work with agile practitioners to improve the overall delivery lifecycle.

## **Requirements**

Degree in Computer Science or Engineering fields or equivalent years of experience preferred.

3+ years' experience in scrum/agile development methodology.

3+ years' experience participating in product backlog prioritization and grooming/refinement.

3+ years of product ownership and helping drive road mapping, planning, and delivery in an agile environment.

3+ years' experience designing processes and solutions for an omnichannel organization preferred.

3+ years' experience designing solutions for retail organizations within E-Commerce Platform (Discovery/Recommendation area is preferred).

Demonstrated experience with analytical and critical thinking skills.

Experience in the B2B and retail business is a plus.

Excellent oral and written communication.

Analytical and problem-solving skills.
