## Authorised Service Technician - Northern Germany

Vollzeit

Poland

Mit Berufserfahrung

02.05.24

Deutsche Windtechnik is one of independently operating manufacturers - leading companies which provide maintenance services for wind turbines. As a recognised specialist company, we offer a wide range of services related to their maintenance, operation and optimisation. These involve all activities aimed at maintaining fascinating devices such as wind turbines in the perfect working order.

We are now looking for an Authorised Service Technician to support our Polish Offshore Team.

### Your profile

Experience as an (authorized) Technician in the wind industry required

Qualified electrician and/or EFK certification

Experienced working according to WTSR (Wind Turbine Safety Rules)

Current valid authorization not necessarily required, but previous experience in leading teams and demonstrating technical competence in Siemens technologies

Experience with various contractors and customers. Practical experience with MS Office applications and preferably ERP Systems, field service management systems as L-Mobile and other remote diagnostic tools

Competent individual who can work under pressure and lead a team of service technicians

Ability to work shifts at the project location (exact shift schedules to be determined)

Knowledge of health and safety legislation required

Comprehensive understanding and demonstrated skills as a maintenance or troubleshooting technician

Excellent organizational skills and ability to quickly adapt to changing business requirements

Driver's license and willingness to travel required

### **Your tasks**

Actively demonstrate leadership in promoting safety both inside the turbine and within the Wind Farm by ensuring accurate reporting of incidents, accidents, near misses, and unsafe actions and conditions

Take charge of leading Troubleshooting and Service teams, overseeing both scheduled and unscheduled maintenance at the site while meeting EHS, quality, time, and cost requirements

Working according to WTSR (Wind Turbine Safety Rules)

Take responsibility for preparing and executing work packages and tasks

Foster the development of technician skills and provide mentoring within your area of responsibility for SGRE technicians. Provide direct supervision and support to all technicians in the team while on-site

Collaborate with other Field teams, Technical/engineering functions, service coordinator/planner function, and senior technicians to monitor the progress of work packages/tasks

Ensure efficient timelines for service activities by following and optimizing maintenance procedures and schedules

Communicate service schedule progress to the Service Planner / Service Coordinator / Senior Technician for input into IT systems. Ensure accurate reporting and utilization of electronic workflow systems

### **What we offer**

Flat hierarchies and short decision-making processes

Accident and health insurance

Company events

Attractive salary conditions and coverage of expenses

### **Have we sparked your interest?**

If so, we would like to get to know you!
