Backend Software Engineer (Python)

Apply Now

Company: Palta

Location: Poland

Category: computer-and-mathematical

Palta is a multi-product tech platform developing several mobile apps focused on health and well-being with a combined audience of more than 60 million monthly active users. Our portfolio includes such successful companies as Flo (global leader in female health), Simple (a nutrition and wellness app with over 15m downloads), Zing (personal fitness trainer), and more.

The rapid portfolio growth was fueled by the recently raised $100 million Series B round led by VNV Global, and the group's revenue is currently sustainably growing 50% YoY.

We work on an in-house monetization Platform for Web Payments with subscription capabilities. Annual turnover is dozens million of USD and we aim to grow. Palta portfolio companies have already integrated with us.

Main focus:

Design and develop new platform services, and integrate them with our data platform

Work closely with the startup's teams and data platform team to ensure smooth and robust integration and quality of services

Stack:

Python 3.12, FastApi, asyncio, pydantic

AWS

Postgresql, Redis

Aws, lambda,

GitHub actions, terraform, grafana, pytest docker

Location: Poland

Qualifications:

4+ years of backend development experience with Python

Strong knowledge of backend databases (NoSQL and SQL)

Experience working with cloud infrastructure (AWS, GCP, Azure)

Experience working with API frameworks such as aiohttp, Django, Flask, FastApi etc.

Frontend development experience (node.js, react.js, etc.) is a plus

Why working with us is awesome

Passionate and highly skilled international team

Palta is a large and rapidly growing Health&Fitness tech holding with a proven track record of developing great products

Equity for each team member with a clear 'exit strategy'

Work-life balance to suit everyone: flexible working hours, remote-friendly approach, loyal sick leave policy

Please read our privacy notice in respect of your application
Please note that your personal data will be stored for one year, as reasonably necessary to resolve any disputes within the hiring process, if any occur.
