

## Big Data Engineer

[Apply Now](#)

Company: Sigma Software

Location: Poland

Category: computer-and-mathematical

### Overview

#### Required skills

Python / good SQL / good AWS / good English / strong

Are you looking for a team of professionals on top of cutting-edge technologies? Are you looking for a place to boost your Big Data career? We invite you to join our Big Data

Competence Center, part of Sigma Software's complex organizational structure that combines various clients, interesting projects, and activities to grow your professional skills.

#### Customer

One of the biggest American universities conducts neurolinguistic research by gathering gigabytes of information, processing the data, and applying machine learning algorithms and models to audio and video files to obtain meaningful and revolutionary research-related insights.

#### Project

The team is developing adjustments and improvements to a Data Platform that gathers incoming video recordings and processes recorded video using Machine Learning algorithms. The platform continuously ingests gigabytes of new video data, expands Machine Learning architecture to conduct experiments, and introduces new models to gather insights and validate hypotheses. Obtain high-quality data for precise results from trained Machine Learning models by developing robust data ingestion and processing pipelines.

#### Requirements

#### Requirements

At least 2 years of hands-on experience in Python and SQL

Proficient in utilizing AWS services, specifically Lambda, AWS Glue, SQS, RDS, and S3

Demonstrated expertise in constructing ETL pipelines for both analytical purposes and internal operations

Skilled in developing web applications using Python web frameworks and libraries

Effective communication skills with the ability to convey technical concepts to non-technical stakeholders

Leadership qualities and self-organizational skills, particularly in addressing complex problems

Practical experience with distributed application concepts and proficiency in DevOps tooling

Strong troubleshooting and debugging abilities

At least an Upper-Intermediate level of English

**WOULD BE A PLUS:**

Experience with Spark or other distributed frameworks

Experience or theoretical knowledge of Machine Learning

Working with Docker and containers

**Responsibilities**

**Responsibilities**

Working with a modern data stack, producing well-designed technical solutions and robust code, and implementing data governance processes

Closely working and professionally communicating with the customer's team

Taking up responsibility for delivering solution features

Participating in requirements gathering & clarification process

Writing unit and integration tests, implementing automated pipelines for code delivery

Developing new pipelines and features leveraging AWS cloud provider services
