

C++ Developer with mathematical algorithms

Apply Now

Company: emagine Consulting

Location: Poland

Category: computer-and-mathematical

Industry:Automotive

Work model:Remote %

Rate:depending on a experience

Contract's length: 12 months (prolongations possible)

Project language: English

Business trips:none.

Start: ASAP

Responsibilities:

Optimization of engine control algorithms: Designing, implementing, and optimizing algorithms for controlling car engines, considering both performance and fuel efficiency.

Development of autonomous driving management systems: Working on algorithms and systems enabling the development of autonomous driving features such as automatic parking, lane-keeping assistance, and automatic emergency braking.

REQUIREMENTS:

5+ years of experience in a software development.

Need to know **mathematical algorithms**.

Mastery of **core C++ concepts** such as **object-oriented programming data structures** , and **algorithms** .

Advanced knowledge of **C++ features** and **libraries** , including Standard Template Library

(STL), memory management, and exception handling.

Experience with C++ standards and familiarity with modern C++ best practices.

Ability to write efficient and maintainable code, optimizing performance where necessary.

Understanding of multi-threading and concurrency concepts in C++.

WE OFFER:

Transparently built relations based on trust and fair play.

Internal reference bonus.
