Company: Intel

Location: Gdańsk

Category: computer-and-mathematical

Job Description

Cloud Software Engineer:

Designs, develops, validates, and debugs software to enable Intel hardware features and to optimize for cloud, hybrid cloud, and/or onprem deployment models.

Understands partner software stacks and optimizes full stack software (spanning firmware, drivers, OS, middleware, SDKs, frameworks, algorithms, and applications) as required to enable cloud software.

May include the development of reference cloud platform software and improving or enabling customer designs to obtain the greatest value from Intel products within the cloud.

May specialize in specific technology domains including data services (ingestion, database, analytics), AI/ML, and opensource development projects.

Qualifications

Qualifications required to be successful:

BSc or higher degree in Software Engineering, Computer Science or related field with 5+ years of experience

Proficiency in C/C++ programming language: 4+ years

Experience in software/firmware development, development methods and practices: 3+ years

Good spoken and written English

Ability to work in a team as an active participant

Effective cross-team cooperation in a multinational environment

Willingness to learn new topics, improve own skillset, influence processes to increase team efficiency

The following will be considered an advantage:
Familiar with C#/Python programming language

Familiar with automated validation and processes

Deep knowledge about Windows and Linux operating systems

Experience with hardware/software interactions, embedded firmware and real-time operating systems

Skills in concurrent programming in a multi-task environment

Experience with version control systems (preferably Git) Basic understanding of HW design

Inside this Business Group

The Data Platforms Engineering and Architecture (DPEA) Group invents, designs & builds the world's most critical computing platforms which fuel Intel's most important business and solve the world's most fundamental problems. DPEA enables that data center which is the underpinning for every data-driven service, from artificial intelligence to 5G to high-performance computing, and DCG delivers the products and technologies—spanning software, processors, storage, I/O, and networking solutions—that fuel cloud, communications, enterprise, and government data centers around the world.

Posting Statement

All qualified applicants will receive consideration for employment without regard to race, color, religion, religious creed, sex, national origin, ancestry, age, physical or mental disability, medical condition, genetic information, military and veteran status, marital status, pregnancy, gender, gender expression, gender identity, sexual orientation, or any other characteristic protected by local law, regulation, or ordinance.

Benefits

We offer a total compensation package that ranks among the best in the industry. It consists of competitive pay, stock, bonuses, as well as, benefit programs which include health, retirement, and vacation. Find more information about all of our Amazing Benefits

This role will be eligible for our hybrid work model which allows employees to split their time between working on-site at their assigned Intel site and off-site. **In certain circumstances the work model may change to accommodate business needs.**
