

Customer Dashboard engineer

[Apply Now](#)

Company: Vonage

Location: Poland

Category: computer-and-mathematical

Vonage Engineering Mission: Vonage is the emerging leader in the \$100B+ cloud communications platform (CPaaS) market. Customers like Airbnb, Viber, Whatsapp, Snapchat, and many others depend on our APIs and SDKs to connect with their customers all over the world. As businesses continue to shift to a real-time, customer-centric communications model, we are experiencing a time of impressive growth.

Why this role matters

The Engineering team at Vonage is a fast growing group of talented engineers.

Engineers here face multiple challenges associated with high performance, distributed systems, and processing large volumes of data in real time.

Our developers work on an exciting mix of both greenfield and existing projects, giving them an opportunity to explore new technologies.

IF THIS SOUNDS LIKE YOU, CONTINUE READING BELOW.....

What you will do

Working on different aspects of the SMS platform and associated tools, server-side or user-interfaces.

Developing and testing new features.

Designing and planning new features, including wireframing.

Creating the supporting functional and technical specifications.

Estimating the effort required to develop and implement.

Supporting release and implementation of developed features.

Adhering to coding standards development processes.

Assisting with in-life maintenance, testing, debugging and documentation of deployed services

What you will bring

Being disruptive. Getting things done. With smart people. Enjoying knowing that the work we do is having a global impact by enabling never before imagined communications.

We have big goals, and we want the people who join us to be self-confident, focused on customers and delivery, and who are structured and committed in their approach. We iterate quickly, we fail fast, we take smart chances. We value those who will help us continue this spirit

Values matter at Vonage. We are on a mission to bring value for consumers and enterprises through global cloud based communications.

But just as important as delivering value is how we deliver that value.

We believe in integrity. Both personally and professionally. We believe in empowering our employees and are actively seeking entrepreneurs in training who want to help build something larger.

We have gotten to this point by being committed, passionate, and focused on getting things done. We need more people like us. If this appeals to you then we encourage you to apply.

What is required for application

Required

Core Java, concurrency, server-side, and front-end experience (JavaScript, Typescript and front end frameworks - Vue Js ideally but React experience will be useful)

Masters / Bachelors degree in Computer Science, or equivalent experience.

Proven ability of programming in Java

Preferred

HTML and CSS3

Cloud experience (ideally AWS)

Understanding of Object Oriented Design and standard design patterns.

Experience of multi-threaded, 3-tier architectures, web services and caching.

A familiarity with databases and SQL (NoSql experience preferred)

Ability and willingness to work in a global, fast-paced environment.

Flexible with the ability to adapt working style to meet objectives.

Excellent communication and analytical skills

Ability to effectively communicate with team members

What's in it for you

Medical Insurance

Group Life Assurance

Optum Employee Assistance Programme

Unlimited Discretionary Time Off

Three Paid Volunteer Days a Year

Pension
