Company: NeoGames

Location: Kraków

Category: computer-and-mathematical

We are NeoGames (Nasdaq: NGMS), a global leader of iLottery solutions and services to national and state-regulated lotteries.

We are part of the NeoGames Group, an iGaming powerhouse with 1100 employees spread across 8 countries.

At NeoGames, we pride ourselves on our "People first" culture. Not only has it been a core value in our organization for as long as we can remember but it also runs in our DNA and is felt in every aspect of our operations.

Join our **Data & BI team** to shape data from across game studios, game aggregation, lotteries, online casino, sportsbook, bingo, and managed services into our group Data Lake. This role is core to transforming data for current and future needs.

Responsibilities:

Collaborate with Data Product to consolidate and enhance the data dictionary

Drive Data Modelling initiatives for better implementation

Maintain detailed data documentation for internal and external assets

Establish standard modelling and data management tools.

Work across teams to ensure the Data Lake meets business needs

Support Data Quality in maintaining data quality indicators

Incorporate necessary controls for Security and Compliance

Contribute to the Data Strategy with a focus on reusability and simplification

Participate in the maintenance of Technology and Data roadmaps

3+ years in a Data role within the iLottery, iGaming, or Sportsbook industries

Degree in Computer Science, Software Development, or Engineering.

Expertise in data modelling techniques

Proven track record in information architecture and governance

Experience with Data Modelling tools like Collibra, Erwin, or equivalent.

Familiarity with RDMS, Columnar, NoSQL engines, and their performance

Experience with cloud architecture and tools (Azure, AWS, GCP)

Familiarity with orchestration tools like Apache AirFlow, dbt

Exposure to Snowflake ecosystem and stream data processing technologies considered assets
