

Data Architecture Project Leader

[Apply Now](#)

Company: Schneider Electric

Location: Poland

Category: computer-and-mathematical

Location & commitments: full-time job, Location: Poland , Home Office Responsibilities:

Maps the flow of data of the business process into logical database structures & business transformation rules. Data discovery in Intel DS and setting up schemas. Brings additional data from already connected or new authoritative data sources to Intel DS. Works closely with Enterprise Architects to understand conceptual & logical data flows and translates them to logical table structures, data mappings & business rules. Works with digital teams to implement physical models (physical table structure, query etc.) based on logical models (logical table structures, data mapping, and business rules) as input for them. Works with digital teams in standardizing and unifying newly ingested data for consumption in ADL layer. Ensures data quality and data governance policies (4 Golden Rules) are being followed. Identifies and advises on sensitive information and provides support for the implementation of data security rules and processes. Monitors social feeds within the company to answer stakeholder doubts, queries, and data quality issues. Provides a relational data model as a standard for consuming applications. Combines elements and business rules to create data quality rules. Collaborates with Europe DDH team in continuous improvement/evolution in the models implemented in Intel DS (Europe BI datamart) with projects like the below: Works with DDH team on moving all data objects used in Nordic Baltic Tableau dashboards to Intel DS in order to comply with 4 Golden Rules. Has an understanding of and works with systems like OneBI and DFL together with data analysts for the time being until all our data are taken from Intel DS instead of OneBI and DFL directly. Supports Data Analyst with the preparation of Tableau dashboards.

Qualifications: Comprehensive experience and knowledge in the data domain. Experience

working with Intel DS. Experience with OneBI and DFL. Ideally, experience with Tableau. Knowledge of ETL (Extract – Transform – Load) tools like Informatica, Alteryx, Tableau Prep, etc., and being able to understand simple SQL language. Understands interactions between their Data Domain and the others. Is knowledgeable about main architecture frameworks, existing data management frameworks (e.g., DCAM), and new models of data organization (e.g., Data Mesh). Database querying experience. Problem-solving and analytical skills to safeguard data integrity, security, and organization. Ideally, some experience with SAP and SAP data. What will you get? EXCITING JOB in an international company, which is leading the Digital Transformation of Energy Management and Automation, with significant market share, DEVELOPMENT - the opportunity to gain valuable work experience in a supportive team of professionals, ONBOARDING TRAININGS to help you find your way in our company, WIDE CHOICE OF BENEFITS - private medical care, life insurance, sports card, performance bonus, benefits cafeteria with the possibility to exchange points for selected products or services, BENEFITS FOR EMPLOYEES' CHILDREN from the company's social fund, ADDITIONAL FAMILY LEAVE - for the birth of a child or adoption, to care for a family member or for bereavement (additional leave beyond the terms of labour law), PROJECT WORK OPPORTUNITY (e.g. ambassador programme, mentoring, digitisation projects), DIVERSE TEAM - working in a diverse team and the opportunity to use foreign languages in your daily work, ACCESS TO TRAINING PLATFORM - training tailored to your needs and career goals, RECOGNITION - points that can be exchanged for various products and services, PARTICIPATION IN CSR or SUSTAINABILITY PROJECTS - 1 fully paid volunteer day per year, EMPLOYEE REFERRAL PROGRAM - have a say in who you work with and get an attractive financial bonus, NO FORMAL DRESS CODE - we welcome people as they are and see diversity as a value to the company.
