

## Data Engineer | Remote

Apply Now

Company: 360dialog GmbH

Location: Poland

Category: computer-and-mathematical

**360dialog** is the leading global solution provider in the WhatsApp Business Ecosystem. We are not only the Nr. 1 access provider, bringing the WhatsApp channel to more than 800 software solutions worldwide (serving more than  $4 \cdot 10^4$  Clients). 360dialog is also pioneering and leading the **Performance Marketing domain on WhatsApp** by providing the **first independent data platform to the Messaging Ecosystem** serving thousands of advertising clients already globally.

At 360dialog, we believe that successful Business Messaging requires a performance-driven data approach and solutions.

As a **Data Engineer** at 360dialog, you'll be in charge of our data platform development, implement database models, ETL solutions, and creating cross-platform automation tools. Join us in revolutionizing business messaging through innovative data-driven approaches.

### Role & Responsibilities

Designing, developing, optimizing and maintaining 360dialog's evolving data platform;

Working with the various teams to create data pipelines and dashboards;

Designing new data warehouse models;

Collaborating with other teams to create automation projects for manual processes;

Researching, experimenting and implementing new data technologies;

## Requirements

### Your skills:

Python development on a cloud-based environment (e.g. GCP);

Experience and understanding of data and data platform concepts and architectures (data lake, data warehouse, etc);

Familiarity or experience with Databricks platform or Databricks' lakehouse concept;

Experience with relational and non-relational databases (e.g. MongoDB, PostgreSQL, Clickhouse);

### Your skills - preferred/optional qualifications:

Designing a data warehouse Model (for example dimension model)

Creating complex SQL queries;

Automating cross-platform processes;

Experience using and creating dashboards in BI software (e.g. Redash, Looker, Omni);

Developing scalable API based microservices and ETLs;

Developing the entire data science lifecycle, from data mining to displaying insights in BI tools;

## Benefits

With 360dialog there is an opportunity to shape a whole new industry in conversational messenger business. You'll be joining a team of experienced entrepreneurs.

Work on one of the most relevant messenger ecosystems in the world (WhatsApp)

Independent work with serious responsibility

Work with an innovative, rapidly developing product in high demand

A remote working company culture with flexible working hours
