

## Data Scientist

[Apply Now](#)

Company: Manning Global AG

Location: Poland

Category: computer-and-mathematical

### Job Description

Our client, a leading global IT service provider, is recruiting for a Data Scientist to join their business in Poland.

Responsibilities:

The responsibilities of this person will include development of components using object oriented programming following good coding practices and extensive components testing.

Additionally, a person will be involved in the full lifecycle of forecasting application development: from data preparation, through modeling, evaluation, productization to maintenance.

Must Have Skills:

3+ years of professional experience, using Python for machine learning solutions development

Understanding of machine learning techniques and algorithms (supervised learning, hybrid models, train/test data sets, overfitting, model evaluation, etc.)

Ability to write high quality code in Python

Professional experience in object oriented programming

At least basic understanding of time series analysis concept

Should Have Skills:

Ability to structure an emerging solution code into well engineered software packages

Experience with or willingness to learn time series forecasting methodologies

Experience, knowledge or willingness to learn modern Deep Learning frameworks for forecasting

Ability to apply unit testing and DevOps / CI/CD / ML engineering techniques

Nice to Have Skills:

Experience with Docker

Soft Skills:

Be team-oriented, proactive, and collaborative

Be an excellent problem solver and analytical thinker

be a good communicator

be willing to learn and expand their skill set

be able to communicate in English at the level of: C1+
