

## DataOps

[Apply Now](#)

Company: itlumier

Location: Warsaw

Category: computer-and-mathematical

### Who we are?

IT Lumier is a new company with international reach specializing in IT HR Consulting and IT Outsourcing. We come from large, established HR and IT companies, but we represent a fresh perspective and new quality in this rapidly changing market. Join our elite and experienced Lumiers team. You will have the opportunity to participate in many interesting projects becoming part of a global community of IT experts.

Our Client is a market leader in the E-Commerce industry, operating globally. We are looking Site Reliability Engineer, who will join to the Team, and help develop the Project. Join us, and we will make sure that the offer is tailored to your needs. We care about our Experts and want to ensure you will expand your skills, meet your financial expectations and develop in the professional field.

### Responsibilities:

Design, develop, and implement data pipelines using Apache Airflow and other data orchestration tools.

Monitor and optimize ELT data pipelines to ensure performance, reliability, and scalability.

Troubleshoot and resolve issues related to data pipelines, ensuring data integrity and quality.

Utilize dbt for data transformation, optimise its usage and operations, define standards and best practices.

Implement and maintain data governance practices, including data lineage and metadata management.

Work closely with the DevOps team to ensure seamless integration and deployment of data pipelines using GitLab.

Stay up-to-date with industry trends and best practices in data engineering and data orchestration.

### **Requirements:**

8+ years of experience as a DataOps Engineer or similar role.

Strong proficiency in data orchestration tools, particularly Apache Airflow.

Solid understanding of data engineering concepts and best practices.

Proficiency in Git, Python and SQL.

Experience with data transformation tools (especially dbt).

Experience with AWS cloud platform (i.a. Redshift, MWAA, Glue, Lambda, S3).

Familiarity with data quality and data observability tools.

Familiarity with DevOps tools (e.g. GitLab) and concepts (i.a. CI/CD, containerization).

Strong problem-solving and troubleshooting skills.

Excellent communication and collaboration abilities.

### **We offer:**

Project fully remote

B2B Contract

Training package

Benefits (medical care, multisport)

Required equipment

Excellent recruitment support

Please send your CV by clicking APPLY. We are happy to answer your questions and talk to you about this project.
