

Developer for Machining Learning Project

Apply Now

Company: emagine Consulting

Location: Poland

Category: computer-and-mathematical

Language: English

Start date for assignment: ASAP

Duration of assignment: 3 months

Workload: Full time

Location: % Remote from Poland or Portugal

Assignment type: B2B

We are currently looking for a Machine Learning Developer to join our client's MLOps team and work on a major Machine Learning project

Description of tasks:

Working the MLOps team, the focus will be strictly on implementation:

- ADO Pipeline Implementation: Setting up Azure DevOps pipelines for automated machine learning model integration and deployment processes.
- Model Registry Development: Building a cloud-agnostic model registry to handle model versioning and deployment across different environments, ensuring seamless integration with existing CI/CD pipelines.

These roles require hands-on development without advisory responsibilities.

Technical skills required:

Cloud Platforms: Google Cloud Platform (GCP) and Azure for hosting and operations.

Machine Learning: Tools like Kedro and Kubeflow for orchestrating machine learning workflows.

DevOps : Azure DevOps for CI/CD processes, along with Kubernetes (GKE, AKS) and

Terraform for infrastructure automation.

Programming: Python, supplemented with other statically-typed programming languages for script development.

In addition, it would be nice to have the following:

Languages: English (C1)

Experience:: 3-5 years of experience

Notice period: 2 weeks

Interview Process:

One screening call with one of our recruiters

Interview with the client

Total support from our HR team
