

EMC Test Engineer

[Apply Now](#)

Company: Aptiv

Location: Kraków

Category: architecture-and-engineering

Help shape the future of mobility.

Imagine a world with zero vehicle accidents, zero vehicle emissions, and wireless vehicle connectivity all around us. Every day, we move closer to making that world a reality. Aptiv's passionate team of engineers and developers creates advanced safety systems, high-performance electrification solutions and data connectivity solutions so that automakers can bring advanced capabilities to more people around the globe. This is how we enable sustainable mobility and help to prevent accidents caused by human error.

Want to join us?

Your Role:

Timely completion of tasks and tests in accordance with customer requirements, international standards and the quality system valid for the Technical Center Krakow.

Analysis of customer requirements, international and industry standards in the area of electromagnetic compatibility testing (EMC), and other areas related to product reliability.

Development of test and validation plans (including scope, standards, methods, test conditions, resource estimation, and test schedules).

Supervision of tests conducted at external laboratories and oversight of tasks necessary for their completion.

Supervision of technical documentation, including preparation, verification, and approval of test reports.

Management of laboratory equipment, including scheduling maintenance and calibration activities.

Coordination of activities with project teams and customers regarding planned/performed tests (including test reports).

Management of the laboratory team responsible for product tests (including supervision of conducted tests) and training others in test-related areas.

Ensuring data confidentiality is maintained.

Safeguarding the company's property, image, and public relations.

Your Background:

Engineering degree (electronics, electrical engineering, physics, or similar)

Fluent English

Analytical approach to problem-solving

Team-oriented approach

Nice to have :

Understanding of EMC principles, standards, regulations, and testing procedures

Experience in conducting a variety of EMC tests, such as radiated and conducted emissions, susceptibility, and immunity tests

Proficiency in using EMC test equipment, measurement tools, and software

Experience in the automotive industry, laboratories, and other research and development areas

Knowledge of IATF 16949 and ISO/IEC 17025 standards

Why join us?
