

Enterprise Architect

[Apply Now](#)

Company: Euroclear

Location: Poland

Category: computer-and-mathematical

For our Enterprise Architecture Division, we are currently seeking an Enterprise Architect.

You will be joining the Enterprise Architecture (EA) division at Euroclear, a leading post-trade financial market infrastructure.

The EA division is an experienced and multi-disciplinary group of architects responsible for:

Defining the enterprise architecture directions & standards, aligned to the company strategies & goals;

Defining the investment themes to develop or transform the IT capabilities supporting the business units' strategies;

Maintaining a multi-year strategic investment plan & technology roadmap and advising on IT investment decisions;

Steering the definition & realisation of capabilities and solutions to support business objectives (process, applications, data and technology) in alignment with the enterprise architecture directions.

Role

You will be joining one of our EA teams and – as an Enterprise Architect – you will guide the implementation of our corporate & IT strategy and IT transformation by defining and managing the enterprise architecture for our business entities and/or an area of our capabilities

including:

Business Entities: Providing a transversal view of the enterprise architecture from the perspective of one or more of our business entities, including our (i)CSDs and other entities within the Euroclear group. Engaging with entity stakeholders to understand their strategic objectives and drivers and connecting towards the capabilities required to realise them and initiatives required to deliver them.

Digital Distribution and Data: Defining the target and transition architecture and roadmaps for our distribution channels, customer and network management, business process management, data management, governance, and platform capabilities.

Core Business and Corporate : Defining the target and transition architecture and roadmaps for capabilities supporting our core business services (. banking, settlement, asset servicing, funds, collateral and issuance) and corporate support functions (. finance, risk, legal, people and communications).

Technology: Defining the target and transition architecture and roadmaps for our IT capabilities and provision of IT services including digital workplace and IT delivery, IT platform and IT infrastructure management.

You will deliver and contribute to the following architectural services:

Strategy Enablement

Capturing and analysing strategic Business and IT **objectives** and leveraging understanding of external industry and market trends, to determine the potential impact on the enterprise's strategy, direction, and architecture

Lead **analysis of current and future-state capabilities and IT environment** to detect gaps and opportunities, assess new technologies, and recommend solutions for improvement to drive the enterprise towards its targeted outcomes.

Facilitating **Business and IT alignment** and supporting the **translation into an executable change roadmap** that will realise the strategic objectives and deliver the targeted value

outcomes, requiring close collaboration with a wide range of stakeholders.

Delivering **target and/or transition architectures and standards** and ensuring they are properly maintained and governed, providing viable options and visibility of strategic direction and implications for the enterprise and for steering of delivery.

Strategy Implementation Oversight

Providing transparency on the **progress of the capability implementation** and alignment with established targets and intended roadmaps.

Providing transparency on the evolution of **Technology Debt** and the planning and implementation of mitigation and remediation actions.

Delivery Planning and Solutions

Developing clear **standards, reference architecture patterns, principles and guardrails**, through the EA governance model, to support effective and efficient decision-making and provide clarity for delivery initiatives.

Collaborating with delivery and infrastructure teams to ensure consistency with the enterprise architecture, to leverage shared technologies, tools and processes where appropriate, and provide continuous feedback towards the further evolution of the enterprise architecture.

Architecture Advisory

Providing consultative advice and support, adapted to stakeholder context, to business leaders and organisational stakeholders who seek actionable recommendations to support decision-making on strategy, delivery, M&A and/or other relevant topics.

Architecture Practice

Collaborating with other architects and supporting delivery of transversal architectural topics and contributing to a positive working environment.

Contributing to continuous improvement of architectural practice and effective delivery of architectural services.

Profile

You have very good analytical, planning and organisational skills, and you can connect the dots and navigate in a constantly evolving environment.

You are result-oriented and you collaborate to deliver business outcomes.

You are able to balance out the longer term and short term views and implications of different options and paths of action.

You are self-motivated, eager to learn and you have a proactive working approach.

You have effective leadership and interpersonal skills and are a team player, able to work effectively at various levels of the organization, with a strong sense of ownership and ability to influence others to move toward consent.

You are a good communicator and you can adapt your messages and style to different audiences and seniority. Fluency in English is required.

You are an active listener.

You are an active contributor to the different communities and governance bodies as applicable.

You have a master's or bachelor's degree in business, computer science, engineering, or a related field of study, or equivalent experience.

You have a good understanding and knowledge of business and technology operating models, strategic planning and cost-benefit analysis, security and risk management, information and data management, systems development methodologies and agile principles and frameworks, and/or IT service delivery, infrastructure and operations.

You have 5 years of experience in two or more of the following disciplines:

Application Development Business Architecture Business Analysis Enterprise Architecture
Information and Data Architecture Solution and Technical Architecture Strategy Development
and Consulting Product Development

You have experience within the Financial Services industry and you have an understanding of the complexity of the regulatory environment – considered as a plus.

You are certified in an Enterprise Architecture framework (. TOGAF) and are familiar with Enterprise Architecture tools – considered as a plus.
