About Us

Where Innovation meets Excellence.

Be a part of a globally renowned management consulting firm that is on the front-line of industry disruption. We are a mid-size player with an entrepreneurial spirit that works with market-leading brands in every sector, while our parent organization Infosys is a top-5 powerhouse IT brand that is outperforming the market and experiencing rapid growth.

Our consulting business is annually recognized as one of the top firms by the Financial Times and Forbes due to our client innovations, our cultural diversity and dedicated training and career paths we offer to our consultants.

As we look to strengthen our team with top talent that can shape the future for our firm, we seek entrepreneurial-minded individuals that value a highly-diverse culture where differences are embraced, that want to have a voice with top management and that are rewarded for collective achievement. We are committed to fostering an inclusive work culture that inspires everyone to deliver their best!

The Team

When you join Infosys Consulting you'll have exposure to strategic projects, you'll be part of a multicultural collaborative team, and your great work will be noticed. In the life sciences practice, we have an inclusive culture that encourages, supports, and celebrates the diverse voices of our colleagues. Together we have a passion for unlocking the most innovative technological solutions used to improve the world of life sciences. In this role you'll be able to see your own ideas transform into breakthrough results for some of the largest

pharma companies around the world. This is more than just a job, it's an opportunity to make a real difference and to exemplify our core values of safety and integrity.

The Role

Provide expertise in the Finance and Costing SAP S/4 HANA module (SAP FICO, COPA, Asset), the integration with other modules and the connected portfolios in it.

Drive implementation and provide technical and business leadership where/when needed to achieve the vision and results of the roadmap.

Define, design, build and oversee the implementation and rollout of ERP functional solutions based on SAP S/4 HANA for SAP FICO.

Develop new features as per business requirements and create documentation, including configuration guides, functional specifications, support test planning and execution

Ensure the solution fits to the company F2P requirements and the end-to-end technical operations processes including systems, interfaces and platforms

Define and contribute to the development of interfaces between SAP and other systems

Act as deployment focal point for assigned data objects in scope for migration

Interacts with local Business Data Owners (BDOs), deployment Functional Process Experts, ETL Team, Legacy teams, etc.)

Analyzes defects, issues from readiness reports and manages data deviations working with relevant stakeholders until resolution

Collaborate with the program and business teams to ensure continuous business and IT alignment

Closely collaborate with functional and IT teams like Business Analysts, Master Data, Process SME, Business SME, users etc.

Manage and guide business analysts working assigned

Lead complex fit/gap analysis and design decisions ensuring that any exceptions from “SAP standard” functionality have sufficient justification and positive value proposition

Own overall inventory of workflows, reports, interfaces, conversions, enhancements, and forms (WRICEFs) for the area of F2P

Coordinate build and deployment work packages ensuring good collaboration with build partners (developers and configurators)

Work closely with regional deployment lead to ensure effective project governance, management and timely reporting of progress on activities and work packages according to the program plan and milestones

Ensure smooth handover of the solution and the systems built to the support and operations teams

Bachelor's or Master degree (Computer Sciences, Software Engineering, Mathematical, Information Systems or Finance & Accounting) or equivalent work experience

Minimum 10 years of SAP FICO + S/4 HANA project implementation experience

Very good command of English language (speaking & writing) and work experience in a multinational environment

Good understanding and application of tools, principles, concepts, and techniques related to requirements, data, usability and process analysis

Has in depth knowledge of SAP Project Management (External PM certification is an advantage), understands business processes and understands cross functional/integration process flow, data and the dependencies

Good Understanding of SolMan ALM methodologies

Influencing capabilities up to Directors in business and Informatics groups.

Good conceptual ability by understanding complex problems/information and good ability to abstract and represent the idea in a simple easy to understand way

Solid communication, able to speak up and good business partnering skills

Be able to manage ambiguity and conduct rapid prototyping to mature requirements

Work in an agile environment and often on multiple initiatives in parallel

Readiness to travel depending to the project/ services needs

Experiences in Pharmaceuticals industry and processes is more advantageous

Experience in delivering solution feedback and proposal in his/her area of expertise

Good CAPEX Experience, incl. integration with Procurement and Project Systems for Assets under Construction

Good Fixed Assets Experience, incl. integration with Financial Accounting and Controlling

Experience with Fixed Assets / Capex business processes, primarily around Vehicles, Fixed Machinery and Equipment plus Buildings incl. Capital Budgeting processes and integration to S/4 HANA

Experience with Depreciation/Amortisation scenarios around Fixed and Intangible assets and the accounting treatment for related Liabilities

Good A/P (Invoice to Pay) experience with integration of cloud procurement solutions such as GEP (desired)

Integration experience with satellite systems for Business Planning and Reporting (SAP Analytics Cloud)

Requirements

About You

As a Finance Solution Architect, you will work on strategic programs in the Life Sciences finance, controlling, manufacturing, and/or logistics areas helping clients in biopharmaceutical, medical devices and drug distribution, and develop strategic business capabilities while further deepening your knowledge in this area.

Our ideal candidate will possess the following qualifications:

Bachelor's or Master degree (Computer Sciences, Software Engineering, Mathematical,

Information Systems or Finance & Accounting) or equivalent work experience

Minimum 10 years of SAP FICO + S/4 HANA project implementation experience

Very good command of English language (speaking & writing) and work experience in a multinational environment

Good understanding and application of tools, principles, concepts, and techniques related to requirements, data, usability and process analysis

Has in depth knowledge of SAP Project Management (External PM certification is an advantage), understands business processes and understands cross functional/integration process flow, data and the dependencies

Good Understanding of SolMan ALM methodologies

Influencing capabilities up to Directors in business and Informatics groups.

Good conceptual ability by understanding complex problems/information and good ability to abstract and represent the idea in a simple easy to understand way

Solid communication, able to speak up and good business partnering skills

Be able to manage ambiguity and conduct rapid prototyping to mature requirements

Work in an agile environment and often on multiple initiatives in parallel

Readiness to travel depending to the project/ services needs

Experiences in Pharmaceuticals industry and processes is more advantageous

Experience in delivering solution feedback and proposal in his/her area of expertise

Good CAPEX Experience, incl. integration with Procurement and Project Systems for Assets under Construction

Good Fixed Assets Experience, incl. integration with Financial Accounting and Controlling

Experience with Fixed Assets / Capex business processes, primarily around Vehicles, Fixed Machinery and Equipment plus Buildings incl. Capital Budgeting processes and integration to S/4 HANA

Experience with Depreciation/Amortisation scenarios around Fixed and Intangible assets and the accounting treatment for related Liabilities

Good A/P (Invoice to Pay) experience with integration of cloud procurement solutions such as GEP (desired)

Integration experience with satellite systems for Business Planning and Reporting (SAP Analytics Cloud)

Benefits
