

Firmware Quality Assurance Engineer

[Apply Now](#)

Company: Groupe SII

Location: Kraków

Category: computer-and-mathematical

The Embedded Competency Center is an organizational unit that brings together over 550 specialists in the field of embedded systems. These are the internal forces of Sii for the implementation of various projects and services with expertise in embedded systems technologies (C, C ++, Python).

As a part of CC Embedded, we deliver embedded systems solutions mainly used in the automotive, semiconductor, and Internet of Things industries. We also have clients e.g. from the medical, cartography, or railway industries.

Become our Firmware QA Engineer and get a chance to work on the most successful access control solutions!

Your role

Testing of new features

Defining test procedures and test cases

Developing automatic test in Python and Robot Framework

Executing tests, creating test reports, and reporting a bug

Your skills

4 years of experience as a Tester

Experience with Python and Robot Framework

Familiar with Continuous Integration tools

Basic electronics and cryptography knowledge

Strong English communication skills

Job no.240409-234OQ
