Full-Stack Software Engineer (Node.js/Nest.js + React) (#15968678)

Apply Now

Company: N-iX

Location: Poland

Category: computer-and-mathematical

Work type: Office/Remote   **Technical Level:** Middle **Job Category:** Software Development

Project: Global market leader in sustainable cultivation

About the Client

Development of integrated responsive front-end web application that supports farmers and growers in the use of and natural, organic solutions that improve the health, resilience and productivity of their crops. The application supports the grower in mapping (possible) problems in the crops, choosing the solution to be used and investigating possible side effects of the solution used. In short, with these tools we make life easier for our customers and technical consultants.

Think of the use of useful insects, for example the use of parasitic wasps in case of too high numbers of whitefly in cultivation.

An existing set of applications has been developed in React and React Native that work on top of a backend from REST and GraphQL APIs. The functionality of these applications is to be brought together in the new integrated application.

Responsibilities:

Take responsibility for discussion, planning and implementation of new features

Writing tested, idiomatic, and documented JavaScript

Be a vital part of our code review process

Working with Nest.js-based back-end and React-based front-end in approximate ratio 70/30

Recommend processes, services, software and other tools to support business objectives

Be proactive, participate in the decision-making process, influence technology stack, take ownership of the end result

Deliver great and consistent results being a part of a Scrum team

Requirements:

3+ years of hand on experience with Node/Nest.js

1+ years of experience with React

Experience with MySQL/PostgreSQL and TypeORM

Understanding of software design principles and back-end application architecture

Knowledge of microservice architecture

Proficient understanding of git

Working Agile (Scrum) experience

Experience with Frontegg would be a great advantage

Good communication skills

Experience communicating and working directly with the client

Good level of English, both written and spoken

We offer:

Flexible working format - remote, office-based or flexible

A competitive salary and good compensation package

Personalized career growth

Professional development tools (mentorship program, tech talks and trainings, centers of

excellence, and more)

Active tech communities with regular knowledge sharing

Education reimbursement

Paid vacation days, sick leaves, and days off

Healthcare & Sport program

Medical insurance

Memorable anniversary presents

Corporate events and team buildings
