

Integration / Data Developer

[Apply Now](#)

Company: Saphunt

Location: Poland

Category: computer-and-mathematical

The Offer

Work within a company with a solid track record of success

Opportunity to make a positive impact

Join a well known brand within IT Infrastructure / Blockchain / Cloud Computing

The Job

You will be responsible for :

Communicating and supporting the use of the data architecture to all stakeholders.

Development of data architecture, strategy and governance.

Providing secure, stable, scalable and cost-effective solutions to facilitate storage, integration, usage, access, and delivery of data assets across the business.

Defining project scope & specifications, estimating resources required to develop the proposed solution to meet customer requirements and developing schedules, test plans and documentation.

Ensuring specifications and requirements are clearly articulated to the development teams and monitoring timelines & progress.

Gathering requirements and specifications from clients and users in conjunction with the

sales team to gain a strong understanding of client expectations.

Identifying potential issues between systems and client specifications and proposing new solutions.

Proposing the technical solution and overseeing the selection of technologies.

Providing clients with regular feedback and updates on projects.

Providing subject matter expertise and direction, guidance, and support on complex sales engagements.

Reviewing proposals and estimates from vendors and ensuring that external solutions work with internal development projects.

The Profile

You possess a degree in Computer Science, Applied Mathematics, Engineering or related field.

You have at least 5 years experience, ideally within a Data Architect or Solution Architect (Data Science) role.

Ability to conceive the data picture from an organisational perspective, and bridge gap between current state and future goals.

Exposure/expertise in one or more of emerging tools like columnar and NoSQL databases, predictive analytics, data visualization, and unstructured data.

Strong expertise in data modelling & database design.

You have strong interpersonal and communication skills and are adept at working with multiple stakeholders to drive desired outcomes.

You are a strong team player who can manage multiple stakeholders

You are adaptable and thrive in changing environments

You are highly goal driven and work well in fast paced environments

The Employer

Our client provides technology consulting and staffing solutions throughout Europe, USA and APAC, and they pride ourselves on their highly professional and service focused approach. Their unique value proposition of being better, faster and less expensive is compelling to our clients, most of whom regard us as a long term partner helping them to achieve their business objectives.
