Java Developer (f/m/d)

Goseriede 9, 30159 Hanover

Full-time

Located in the heart of Hanover, HIS Hochschul-Informationen-System eG is a software company that develops IT solutions for over 200 universities in Germany. We owe our success above all to our strong team of more than 300 employees. Become part of it and shape a future-oriented industry together with us.

Our projects revolve around the continuous development of our campus management system HISinOne and our HR and financial management software (ERP software).

The focus here is primarily on the digitalization of processes in everyday university life. In addition to functional development, the user experience for the users of our HISinOne software is particularly important. Dusty administrative processes are a thing of the past - our aim is to continuously improve the quality of university processes.

What tasks do I take on?

You concentrate fully on the project at hand and take on the further development of our

campusmanagement system HISinOne or our HR and financial managementsoftware (ERP software), with a focus on Java.

You will be responsible for implementing new featuresand functions in close technical coordination with our productmanagement and the project team.

Whethermaking adjustments to the application and enrolment process,creating a digital student file or organizing exams and events, youwill work as part of a team to further develop digitalizationprocesses and ensure greater efficiency and usability in everydayuniversity life.

The necessary test coveragevia automated software testing (JUnit) rounds off your area ofresponsibility.

Tech stack: Java (JSF, Spring, Hibernate), TypeScript (Angular), PostgreSQL, GitLab, Eclipse, Visual Studio Code

What is expected of me?

You already have a successfully completed degree in computer science or in one of the STEM subjects. Alternatively, you have completed vocational training in application development.

Experience in relevant software development projects means you are very familiar with the day-to-day work of a developer.

A basic understanding of UML, especially class and activity diagrams, is a matter of course for you.

Ideally, you have already worked with Spring and/or Hibernate as part of a framework or you have mastered familiarization with these frameworks.

German as a corporate language is no obstacle for you to contribute your clever mind to the everyday life of a developer at HIS.

What does HIS eG offer me?

An open-ended employment contract with remuneration based on tasks and experience, which is based on the collective wage agreement for the public sector (TV-L)

and includes social benefits such as an annual special payment and a company pension scheme (VBL)

A varied and challenging job in a family-friendly company

Flexible working hours without core hours in the working time frame between 6.30 am and 7.30 pm, possibility of mobile working

30 days of vacation and the option to take flexitime - Christmas Eve and New Year's Eve are days off for us

A friendly and motivated team, flat hierarchies and a good working atmosphere

A well-equipped workplace with modern software and hardware in the center of Hanover

A qualified induction as part of a mentoring program as well as individual training opportunities

A job ticket in the form of the Deutschlandticket for all employees free of charge, a company fitness program (Hansefit) and other health promotion offers

Free fresh organic fruit every week
