Java Full Stack Developer

Technology Lead

118388BR

Job Description

Job Title: Java full-stack developer (Poland, valid work permit in Poland is required)

About You: Are you passionate about Java Full Stack development? Do you thrive in complex technical landscapes? Join us and be a part of our dynamic team, where your skills and talents can truly shine.

About Infosys: Infosys is a global leader in next-generation digital services and consulting. Our mission is to empower organizations worldwide through cutting-edge technology solutions. With a presence in 54 countries, we've been serving 46 clients since 1981. Our primary focus is on software development, maintenance and independent validation services to companies in finance, insurance, manufacturing and other domains.

Role Overview: In this role, you will interface with key stakeholders and apply your technical proficiency across different stages of the Software Development Life Cycle including Requirements Elicitation, Application Architecture definition and Design. You will play an important role in creating the high-level design artifacts. You will also deliver high-quality code deliverables for a module, lead validation for all types of testing and support activities related to implementation, transition and warranty. You will be part of a learning culture, where teamwork and collaboration are encouraged, excellence is rewarded, and diversity is respected and valued.

Responsibilities :

Serving as a core member of an engineering team that designs and develops software applications.

Writing code and unit tests, working on API specs, automation, and conducting code reviews and testing.

Performing ongoing refactoring of code, utilizing visualization and other techniques to fast-track concepts, and delivering continuous improvement.

Build Proof of Concepts and lead the team in extending concepts to Enterprise Systems.

Ability to effectively debug and resolve technical issues and/or defects that may be reported because of faults in the production system.

Manage risks and issues as well as cross dependencies with other teams. Communicate effectively with internal teams and clients to address technical design and functional gaps.

Partner with stakeholders to continuously upgrade applications/platforms as per industry standards and Technology stack latest offerings

Harness the opportunities to build Intellectual Property within the team and for the enterprise.

Qualifications:

Proven experience as a Java Full Stack Developer or similar (6+ years), and strong proficiency in Java programming language (Java 8+)

In-depth knowledge of frontend technologies including React JS and JavaScript

Strong understanding and hands-on experience with RESTful and SOAP web services for building and consuming APIs

Knowledge of the Spring Framework

Proficiency in relational databases, Oracle preferably, but also MySQL or MS SQL

Proven track record within a technical lead/architect role to produce innovative and simple solutions to complex problems.

Excellent communication and collaboration skills.

Strong problem-solving and analytical skills

Joining Infosys means:

Contribute to projects that transform clients' businesses.

Thrive in a diverse and supportive teamwork environment.

Work with the latest tools and tech stacks.

Access mentorship and leadership opportunities.

Invest in your career with training, global exposure, and leadership pathways.
