Java Software Architect

Apply Now

Company: Divante

Location: Wrocław

Category: computer-and-mathematical

Want to shape the world of eCommerce with us? Divante creates **eCommerce solutions** that make the business of our clients thrive.

For our newly established Java department we are looking for **Java Software Architects/Tech Leader.** This is a strictly technical role – you will not be expected to manage a team or project (unless you feel like doing it) – we need you to be the technical mastermind behind our solutions able to push our technology game to a new level. It is a great opportunity to lay the foundations for a new endeavour and establish the ways of working the way you know is right and grow together with the organization. If you want to join us in this exciting times, we would need you to tick most of the boxes below.

Are you ready to take on this adventure?

Employment type: B2B or CoE

Salary:

160 - 180 PLN/h net

22 200 - 25 200 PLN gross

Your daily tasks as a Software Architect/Tech Leader:

Coordinating work between integration analysts and developers,

Providing feedback to integration stream leader and integration advisor about status, issues, and risks,

Challenging integration analysts on their proposal,

Proposing and **challenging the architecture,**

Defining the communication layer between front and backend,

Defining synchronization process to ensure that frontend and backend are aligned,

Defining events used by the system and shared inside clients IT eco-system,

Proposing KPIs to ensure that the system is working correctly,

Contributing and animating event-storming sessions,

Ensuring that the service respect guidelines from enterprise architects,

You will be a perfect match if you:

Have 10+ years (total) of hands-on work in software development in an engineering position with direct exposure to code – it is a strictly technical role, and you need to be up to date with modern tech.

Have experience designing Cloud-based, multi-layered applications **(database, backend, services, front-end)** – either **Azure, AWS or GCP will do.**

Hands-on programming experience with **Java, Hibernate, Spring Boot.**

Have Good understanding of front-end technologies – we do not expect you to be an expert programmer in JS, but you need to be aware of what these technologies are capable of and which to pick and when.

Have excellent knowledge of modern software engineering processes and tools (**GIT, Jira/Azure DevOps, Agile development practices, DevOps run by the actual dev team, unit testing etc.).**

Very good understanding of Containerization, Cloud infrastructure, CI/CD pipelines, e2e testing process etc.

Worked in Scrum (we do not want you to be a Scrum Master, but we need you to understand what is going on).

Have ability to work in English on daily basis both internally and with the customers.

Will to mentor senior engineers and support them in solving technology challenges.

Some experience with the following would be an advantage: **Kafka Apache, MongoDB,** relational database **(MS SQL, PostgreSQL).**
