

## Junior Data Analyst

[Apply Now](#)

Company: Novocure

Location: Poland

Category: computer-and-mathematical

Novocure is a global publicly-traded commercial-stage oncology company developing a profoundly different cancer treatment therapy called tumor treating fields (TTFields) for patients with solid tumors. TTFields therapy is a non-invasive, novel, antimitotic treatment modality which utilizes proprietary technology attempting to slow or reverse tumor progression by inducing tumor cell death. Novocure's commercialized product, Optune, is approved for the treatment of adult patients with glioblastoma (GBM) in the USA, Europe and Israel. Novocure has ongoing or completed clinical trials and is further expanding its efforts into several other solid tumor indications - non-small cell lung cancer, pancreatic cancer and other types of solid cancers.

Novocure Poland is our newest office in Europe and you will be part of a global business services team supporting multiple business functions including finance and payroll and located in Krakow. The global business services organization within Novocure Poland is critical to Novocure's efforts to drive process efficiency, standardizations and drive greater business value as the company prepares for future growth.

To support our team in Krakow, Poland we are looking for an:

### Junior Data Analyst

The Junior Data Analyst will lead forecasting for the US Business Operations Team to drive business growth. US Business Operations provides analytics and operations support to Novocure US. We work with our partners in sales, patient experience, and medical affairs to analyse and report on the business.

The Analyst will also lead analytics projects to understand critical aspects of the business

and suggest possible solutions. The Analyst will work cross functionally with all partners in the US. The Junior Data Analyst will also help design and implement operational experiments to drive efficiency and effectiveness. The Analyst should have strong communication skills and be able to build a clear narrative to describe results.

**Your responsibilities:**

Collect, clean, and preprocess data from various sources to ensure accuracy and reliability.

Perform exploratory data analysis to identify trends, patterns, and anomalies.

Develop and implement basic machine learning algorithms for predictive modeling and classification tasks.

Assist in the design and execution of A/B tests to evaluate the effectiveness of different business strategies.

Create visualizations and reports to communicate findings to stakeholders effectively.

Collaborate with cross-functional teams to understand business needs and provide data-driven solutions.

Stay updated with the latest tools and techniques in data analysis and machine learning

**Requirements:**

Bachelor's degree in a quantitative field such as Computer Science, Statistics, Mathematics, or related field.

Strong analytical skills with the ability to interpret complex data sets.

Proficiency in SQL for data manipulation and extraction.

Familiarity with programming languages such as Python or R.

Data modeling skills

Understanding of basic data warehouse patterns (e.g., star schema, slowly changing dimension)

Knowledge of cloud computing platforms such as AWS, Azure, or Google Cloud is a plus

Familiarity with data pipelines and integrations

Experience with data visualization tools such as Looker, Tableau, or Power BI.

Experience generating reproducible reports

Basic understanding of machine learning concepts and algorithms.

Excellent communication and presentation skills.

Ability to work independently and in a team environment.

Proficient with Microsoft Office, including Sharepoint.

Fluency in both written and Spoken English as this is the language you will be working in

**Benefits :**
