Miejsce pracy: Kraków

Technologies we use

#### **Expected**

Jira

### **About the project**

Model Risk Management (MRM), part of Global Risk & Compliance, is responsible for providing second line of defense for HSBC's model risk.

Infrastructure caters to both strategic and operational aspects of managing model risk and enforces Model Risk Policies through technology. They are responsible for reporting production across Model Risk Management including dashboard developments, data retrieval and quality updates, model inventory reporting and attestation tracking, data visualisation and analytics, Model Risk Management data and systems management, and systems and technology enhancements.

#### Your responsibilities

The Lead AVP role takes a leading role in delivering the model risk Product

Management & Infrastructure capability through full lifecycle change delivery across a

dynamic and varied suite of Model Risk products.

The role acts as interface across multiple IT & business aligned PODs to ensure that

delivery is well sequenced & prioritized appropriately through required governance channels.

Acts as primary liaison between business users, technical delivery teams and sponsors to provides transparency around the business roadmap whilst identifying dependencies between various activities across teams.

Drive governance that is accountable and meaningful, supporting delivery aligned with MRM practices.

Participate in projects leading to productionised solutions using various analytic techniques through involvement in any or all of the following activities.

Data Quality Analysis, Segmentation, KRI modelling, ad-hoc analytics and solution design.

Trend Analysis and Dashboard Creation based on Visualisation techniques.

Data Implementation Checks and Data Quality Assurance.

Development of model and data attestation frameworks.

Development of bespoke solutions and tools to enhance the effectiveness and efficiency of Model Risk Management practices & processes.

Provide support to members of the Infrastructure team and wider Model Risk Management team across the bank.

Interaction and training of users for tooling & solutions developed.

Subject Matter Expert (SME) for internal procedures, ensuring team wide understanding of ways of working.

Collaboration to ensure all requirements, data logic / calculations have sufficient clarity and are aligned to business objective.

Help build management, regulatory, and external confidence in all models used across the group.

Support the team lead for all Model Risk Management infrastructure objectives.

Support intra-team initiatives and deliver personal objectives to a high standard.

## Our requirements

Comprehensive knowledge of Agile delivery management methodology.

Strong understanding of model development or model risk management processes.

Strong understanding of the product development lifecycle.

An innovative thinker who understands latest ways of working and can apply these in a flexible way.

Strong Business Analysis experience through lifecycle (user story creation, test management, user training & comms).

Good data visualization skills – Tableau, Alteryx, Qlik Sense exposure will be an asset.

Good knowledge of JIRA.

Database architect / scheme design

Good Presentation Skills.

Ability to understand complex data and resolve issues in the process of building analytic tools to support users.

Team-oriented mentality combined with ability to complete tasks independently to a high-quality standard.

Ability to build and manage successful relationships with senior stakeholders.

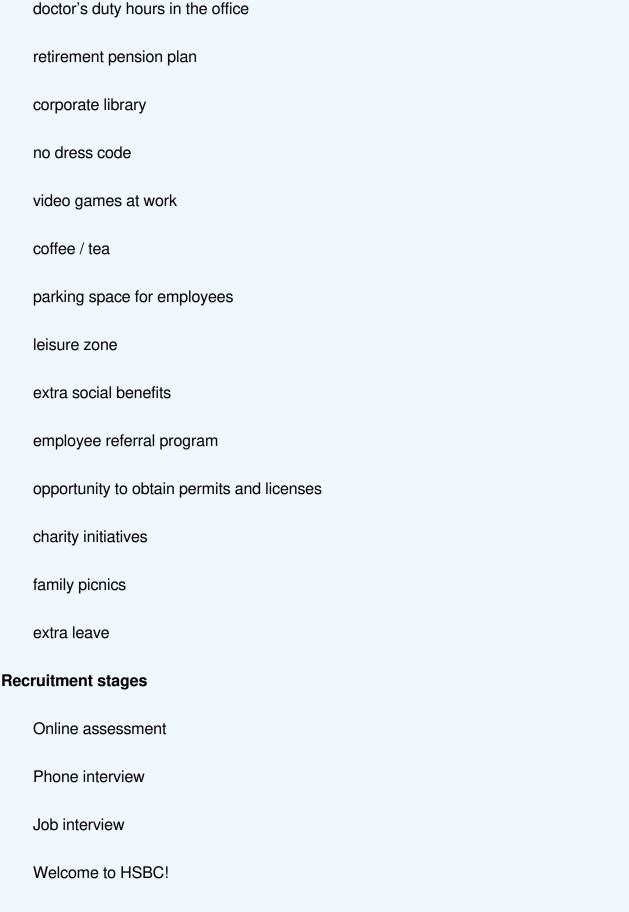

2-3 years plus experience of working in a mature Agile delivery pattern.

Experience working within a large modelling or model related function at a Financial Institute is preferred.

Preferred degree in a quantitative discipline such as Financial Mathematics, Statistics, Econometrics, Quantitative Finance, Economics or Engineering.
