Lead Full Stack Engineer

Apply Now

Company: Spyrosoft

Location: Poland

Category: computer-and-mathematical

Requirements

Node.js/Nest.js Angular Typescript AWS/GCP/Azure CI/CD English

Project description

As a team, we use design methods to turn business challenges into meaningful products and services. We believe in experimentation, understanding the bigger picture and purpose in what we do.

We're currently looking for a who will join our team to work on a new project, involving building a new platform for one of the market-leading customers.

Main responsibilities:

Designing and architecting a modern web application with a cloud-based backend

Active participation in the process of requirements gathering giving a feasibility perspective

Close cooperation and communication with designers, product manager, and the customer stakeholders

Leading the team and the project from the technology perspective

Writing high-quality code

Diagnosing and solving software problems.

Position requirements:

8+ experience as a full-stack/backend engineer in a similar position (technology agnostic lead)

Very good knowledge of design patterns and backend architectures, especially building scalable cloud-based applications

Practical knowledge of at least two: AWS/GCP/Azure/Kubernetes/Docker services and components

Excellent experience in programming in at least two of the following languages/frameworks: node.js/nest.js, Typescript, Python, Dart/Flutter, .NET/C#

Good experience of programming in one of the following frontend frameworks: Angular, React, Vue

Knowledge of ECMAScript 6, HTML 5, CSS 3/SCSS

Practical experience in setting up CI/CD pipelines

Great communication skills

English B2 / C1 level.
