

Poland Jobs Expertini®

Mid or Senior Level Backend Engineer

[Apply Now](#)

Company: ClickUp

Location: Poland

Category: computer-and-mathematical

ClickUp is the world's only all-in-one productivity platform that flexes to the way people want to work. It replaces all individual workplace productivity tools with a single, unified platform including project management, document collaboration, spreadsheets, chat, goals, and more. On a mission to make the world more productive, ClickUp is headquartered in San Diego and scaling remotely and internationally. As one of the fastest-growing SaaS companies in the world, ClickUp helps millions of users to be more productive and save at least one day every week.

Are you passionate about productivity? If you haven't yet discovered ClickUp, now is the time! We are hiring for 8 new Senior Backend Engineers in Poland!

You can live anywhere in Poland, and work remotely! You can work on B2B with our US Entity, or via EC; your choice! As we accelerate our expansion in Poland, we're seeking a Senior Backend Engineer to join our Platform team! You'll be part of an exceptional, talented engineering team tasked with scaling the platform for future growth. Our slogan - we're recruiting teammates who share our core values, know how to get sh*t done, and add to our very driven culture. You'll have the opportunity to make significant contributions to a product used by millions, including us! You'll tackle the unique engineering challenges of rapid-growth startups, providing opportunities for learning and development along the way. Throughout this journey, you'll be backed by your team and the modern toolstack we employ. We are offering flexible working hours, remote work, competitive salary augmented with participation in company success. If you're the one we're searching for, don't hesitate. Apply now! **The Role:**

Be part of the team that builds one of the most critical and highly used products in ClickUp.

Build scalable and highly available platform to processes millions of customer workflows a day and maintain it to run across all our regions and data centers

Collaborate with Product Managers and Designers to establish product requirements, define scope, and assess business impact.

Contribute to the design and construction of systems that prioritize performance, reliability, and scalability.

Understand the intricate workings of our infrastructure and how all components interact.

Work alongside fellow engineers to deliver sophisticated backend features outlined in the roadmap.

Challenge the status quo.

Have fun!

Qualifications:

An eagerness to learn.

Strong sense of ownership and accountability.

Team player with excellent communication skills.

Don't be afraid to voice your opinion and help making the product better

Bachelor's Degree in Computer Science/Engineering or equivalent experience.

5+ years of experience in creating and maintaining a production environment.

Proficient with TypeScript or other popular programming languages.

Familiarity with SQL and relational databases (preferably PostgreSQL).

Preferred Qualifications:

Passionate about Productivity platforms and saving people time by making the world more productive!

Proficient in Node.js / Nest.js / Express.js / TypeScript

Previous experience with workflows or event driven automations in consumer or enterprise companies

Building High Scale systems with millions of events processing in an hour

Knowledge of Redis, Kafka, Docker

Familiarity with running a platform on top of AWS
