

Middle DevOps Engineer (#74)

[Apply Now](#)

Company: N-iX

Location: Poland

Category: computer-and-mathematical

Work type:Office/Remote **Technical Level:** Middle **Job Category:** Software Development

N-iX is a software development service company that helps businesses across the globe develop successful software products. Founded in 2002 in Lviv, N-iX has come a long way and increased its presence in six countries Poland, Ukraine, Sweden, Bulgaria, Malta, and the US. Today, we are a strong community of 1,800+ professionals and a reliable partner for global industry leaders and Fortune 500 companies.

Within this role, you will support the AWS cloud environment and maintain the underlying AWS infrastructure for all hosted applications and services of our Client.

Responsibilities:

Assume a lead role in supporting a complex AWS cloud environment for a growing, fast-paced healthcare startup

Maintain the underlying AWS infrastructure for all hosted applications and services, including EC2 instances (Windows and Linux), virtual networking, and AWS-managed services such as RDS, S3, and Lambda

Help administer RDS database environments (SQL Server, others) including DB export and restore

Manage user access to internal AWS resources using AWS IAM and network controls such as security groups, VPN, and Active Directory

Work with the engineering teams to set up and maintain the continuous integration

environment (Bamboo, Octopus)

Set up Linux and Windows EC2 instances to support corporate computing and the application environments

Implement and support monitoring and alerting tools (AWS tools, Nagios, and external tools such as Loggly) for proactive responses to all technical issues

Understand the application and deployment environments (.NET/C#, Node, Java) and work closely with engineers in order to have the best hosting and build pipeline solutions possible

Help grow and champion infrastructure-as-code as we mature our DevOps practices

Be available to support deployment and other off-hours maintenance

Troubleshoot production issues as necessary

Requirements:

3 to 4 years of related DevOps experience

Deep knowledge of AWS, including security and identity, and AWS services like RDS and Elasticsearch

Good networking knowledge including DNS, security certificates, subnets, routing, VPC peering, and VPN setup

Comfort in at least one scripting language such as Bash, Python, or Powershell

CloudFormation or Terraform experience, and/or experience with other automation tools such as Chef or Ansible

Excellent Oral and Written Communication skills

English level Upper-intermediate or above

We offer:

Flexible working format - remote, office-based or flexible

A competitive salary and good compensation package

Personalized career growth

Professional development tools (mentorship program, tech talks and trainings, centers of excellence, and more)

Active tech communities with regular knowledge sharing

Education reimbursement

Paid vacation days, sick leaves, and days off

Healthcare & Sport program

Medical insurance

Memorable anniversary presents

Corporate events and team buildings
