Company: itlumier

Location: Warsaw

Category: computer-and-mathematical

Who we are?

IT Lumier is a new company with international reach specializing in IT HR Consulting and IT Outsourcing. We come from large, established HR and IT companies, but we represent a fresh perspective and new quality in this rapidly changing market. Join our elite and experienced Lumiers team. You will have the opportunity to participate in many interesting projects becoming part of a global community of IT experts.

Our Client is a market leader in the E-Commerce industry, operating globally. We are looking Site Reliability Engineer, who will join to the Team, and help develop the Project. Join us, and we will make sure that the offer is tailored to your needs. We care about our Experts and want to ensure you will expand your skills, meet your financial expectations and develop in the professional field.

Requirements:

Bachelor's or higher degree in Computer Science, Engineering, or related field

8+ years of experience in ML engineer or similar role

Good understanding of ML and AI concepts. Hands-on experience in ML/AI model development.

Hands-on experience with containerization (using Kubernetes, Docker)

Experience in operationalizing Data Science projects (MLOps) using at least one of the popular - frameworks or platforms (e.g. Kubeflow & AWS Sagemaker).

Proficiency in Python used both for ML and automation tasks.

Good knowledge of Bash and Unix command line toolkit.

Experience in CI/CD/CT

Nice to have qualifications:

Certification in relevant techniques (e.g. AWS Certified Machine Learning Specialty)

About the position:

Build and deploy machine learning solutions into production

Creating microservices for task-specific AI cloud services

Implement solutions for monitoring model performance and triggering alerts.

Design and implement infrastructure for machine learning cloud services

Develop ML flow automation scripts

Research modern MLOps tools, frameworks and platforms

Work on a backlog of activities to raise MLOps maturity in the organization.

Proactively introduce a modern, agile and automated approach to Data Science.

Conduct internal training and presentations about the benefits and usage of MLOps tools.

Please send your CV by clicking APPLY. We are happy to answer your questions and talk to you about this project.
