Company: endegospzoo

Location: Kraków

Category: computer-and-mathematical

Endego is all about people

At Endego, we take pride in creating comprehensive engineering solutions that set standards in the industry. Our specialization covers sectors such as automotive, railway, agriculture, heavy-duty vehicles, commercial vehicles (such as buses), and additional sectors like medical and household appliances. As a company with Polish roots, we have seven branches in Poland with headquarters in Krakow, and also an office in Munich.

Our organizational culture is based on openness and building collaborative partnerships. We believe that success is achieved through cooperation and communication, which is reflected in our daily activities. We can proudly say that at Endego, people come first.

Our team currently consists of 300 skilled specialists, including engineers, as well as experts in other fields. We are a dynamically growing company, and our ranks are constantly expanding.

Join us!

If you are passionate about working in an international environment, want to develop your skills, and be part of a team that genuinely influences the development of modern technologies, then Endego is the place for you!

Become part of Endego and let's shape the future of engineering together!

Responsibilities

Design, implement, and validate Android Automotive/Android OS software

Integration of customer software components

Bring-up of new HW on Android OS

Debug and troubleshoot Android-based systems

Develop unit, design, and integration tests

Analyze and implement product requirements

Participate in design and code reviews

Develop relevant software documentation

Requirements

4+ years of experience in development in Android OS (TV or Automotive)

Experience in Android OS software development and integration, especially with deep experience in Linux and/or Android lower layers e.g. kernel, framework, vendor specific libraries, device drivers, protocol stacks

Understanding of Android Architecture, Android Ecosystem, and Android Debugging

Understanding of Android Services, Wifi, Ethernet, HAL, System

Good analytical and communication skills

Advanced level of spoken and written English

Good knowledge of device firmware updates, OTA, etc - nice to have

Experience in automotive, especially in the area of infotainment system - nice to have

Experience in full-stack development for Android - nice to have

We Offer

Any form of employment - employment contract or B2B

Flexible working hours

Diversified and international projects

Private medical care Medicover

Subsidized sports card and language courses

Funding of preventive mental health support

Attractive employee referral program
