Why to #ShapeYourWorld with Fujitsu?

Want to work with teams who achieve together and with technology that is shaping the way the world learns and lives? Come and #ShapeYourWorld at Fujitsu! We are the leading Japanese information and communication technology (ICT) company, offering a full range of technology products, solutions, and services. We use our experience and the power of ICT to shape the future of the global society together with our customers. We're looking for Network / Network Security Engineer.

Read the job description, leave your CV, and grow as an expert with us!

Job Description:

We are looking for an experienced network technician to join our team. As a Network Engineer, you will have a central role in the planning, implementation, and maintenance of our network infrastructure. By working closely with the IT department, you will contribute to the development of robust and secure network solutions.

Responsibilities:

Design and implement scalable and reliable network solutions based on organizational requirements.

Configure and maintain routers, switches, firewalls, and other network devices.

Upgrade of network equipment and software.

Monitor network performance and fix any network-related issues.

Implement and manage network security protocols and operations.

Collaborate with different devices to ensure a seamless integration of network systems.

Evaluate and recommend network hardware, software, and communication protocols.

Document network configurations and changes for reference and future troubleshooting

Cisco switches Manage Cisco switches Create Vlans Manage Vlans Delete Vlans Install Cisco Switches configure Cisco Switches decommission Cisco Switches Take backups of Cisco configurations restore Cisco configurations Upgrade Cisco Switch firmwares Do functionality and performance checks Do trouble shooting Monitoring of Cisco Switches Handling breakfix management wise(create case at backup vendor) Do Documentation
