

Node.js Developer

[Apply Now](#)

Company: LeverX

Location: Poland

Category: computer-and-mathematical

We are looking for an experienced Developer who will join our team!

Opportunities:

Excellent working environment: the company is big enough to be reliable, yet small enough to be person-oriented.

Full-cycle projects and product development.

Training & development-focused approach: clear roadmap for training employees to sustain and enhance the productivity of the organization as a whole, internal technical meetups, free English classes.

Collaboration with the teams from the European Union and United States both on-site and remotely.

Work-life balance to suit everyone: flexible working hours, loyal sick-leave policy, student-exam-session-friendly approach, corporate events and sport activities.

You will:

Design and develop large scale web applications using .

Focus on backend software development and interface with third party APIs.

Contribute to the overall software development life-cycle including requirements gathering/analysis, design, development, release/version control, testing, deployment and support.

Be a part of an agile-based and globally distributed team.

Need to have:

Strong development skills;

Strong TypeScript and JavaScript experience;

Experience with SAP CAP/BTP;

Experience in designing and developing of REST APIs;

Experience with distributed source control systems (. Git, Mercurial);

Knowledge of frameworks available for (such as , Express, SAP CAP, LoopBack);

Experience in relational (MySQL, PostgreSQL, , document-oriented databases (MongoDB) and KV-storage (Redis);

Strong understanding of software best practices, data structures, algorithms, databases, and networks;

Fluent English (Intermediate, Upper-Intermediate, Advanced).

Nice to have:

Experience in writing unit, integration tests (Jest, Mocha, Chai, Supertest).

Familiarity with message passing technology such as AMQP and ZeroMQ.

Experience with Docker.

Experience with AWS (EC2, S3, , Microsoft Azure, and other related cloud technologies.

Practical experience in Agile development methodologies.

Knowledge of design patterns.

Good communication skills.
