Company: Schibsted Tech Polska

Location: Kraków

Category: computer-and-mathematical

Exciting Opportunity for Python/Django Developers at Schibsted Nordic Marketplaces!

About us:

Join one of Nordic's most agile companies on **growth journey**. Our marketplaces hold strong #1 positions and operate in **digitally mature** and highly attractive markets with **27 million inhabitants**. With **1400 colleagues** in the Nordics, we share a passion for our work and foster a friendly and caring community. **Curiosity, teamwork with problem-solving, and continuous learning** are the cornerstones of our culture.

About Mobility Pro:

Embark on a thrilling journey with Mobility Pro, a vibrant team sharing **B2C Mobility Seller experience** in the Nordic region using **modern technologies**. Join our dynamic department of **15 engineers and professionals** across Kraków, Stockholm, Oslo, and Aarhus. Our mission is to streamline and enhance the **car trading experience**, overseeing the complete sales journey, from **advertising to delivery and post-sale support**. Dive into a tech stack that includes **TypeScript, React.js, modern JS/UI frameworks and libraries, Django/Python for the backend, AWS** as our cloud provider, **Git** with **Github** for **version control**.

The backend developer role:

As a **Backend Developer** in our tech department, you'll work with a combination of **new technologies** as well as maintenance of older parts of the tech stack, surrounded by **skilled colleagues**. You will collaborate closely with **Product Manager, UX, and other teams** to understand the needs and requirements. You will produce great APIs in an **event-driven**

environment where we expect you to take **full responsibility for your product** running/operating the services and maintaining the underlying stack. You will work with **continuous improvement** through exploring new tools, and spending time on training, pairing, and mob programming.

Your responsibilities will include:

Work on microservices within **event-based architecture** using **Django Rest Framework and Python**.

Release your own code **continuously and often** employing **DevOps mindset** where you are responsible for your change from commit to production.

Ensure quality by writing **automated unit- and integration tests**

Work with the primary components of our tech stack including **Docker, Kubernetes, Kafka, RabbitMQ, Postgre SQL Server, MySQL and Elasticsearch**

Collaborate with our **Schibsted colleagues in the Nordics** around software solutions, using shared services and exchanging knowledge.

Key qualifications:

Experience with **Python, and Django REST framework**

Testing proficiency, both automatic and manual.

Ability to prioritize tasks and work independently

Proficient in **spoken and written English**

Experience with **Linux Docker, Docker swarm, Kubernetes AWS + Terraform** (RDS, OpenSearch, ElastiCache, Amazon MQ etc).

What we offer:

Continuous personal and practical development

Exciting **career opportunities within Schibsted**

Meaningful work with diverse, international, and passionate teams.

A great atmosphere, **open-minded culture**, and social team activities.

Hybrid workplace environment with flexibility, enabling work from home **3 days per week**

Next Steps:

We invite candidates on an ongoing basis, and we encourage you to **apply today**! If you have any questions, feel free to **contact our team**. Be part of our innovative journey and contribute to making a difference in our customers' lives. **Apply now!**

About the Company:

Schibsted Tech Polska with over **300 employees in Kraków & Gdańsk**, is a programming hub creating **mobile & web applications for leading Scandinavian startups & media companies**. Focused on developing news, marketplaces, and online applications, we foster a **flat structure, modern technology stack, and mutual trust** pillars of our great atmosphere. Join us and be a part of something extraordinary!
