

SAP R2R Business Solution Architect

[Apply Now](#)

Company: Epm

Location: Poland

Category: computer-and-mathematical

Description

About the role

We are looking for an SAP R2R Business Solution Architect to become a part of our tight-knit EPAM team and engage in technology-driven activities. As an SAP R2R Business Solution Architect, you will be granted a fascinating opportunity to work in a leading software engineering and IT consulting company. If you want to gain vast professional experience and enrich your knowledge welcome on board.

With a relationship of close to thirty years with SAP, EPAM have been on the engineering side of SAP for many of their enterprise product releases, helping them engineer their product and helping them to go to market over the decades.

EPAM are now looking to add a consulting arm to our award-winning engineering services.

Responsibilities

Run SAP pre-sale and implementation project governance, including business requirements adjustment and development, fit-gap analysis, process and organizational change, troubleshooting and root cause analysis

Support assessment of current customer solutions and potential areas of opportunity for SAP solution implementation

Support adjustment and development Record-to-Report (R2R) functional requirements and identification of related IT and business enablers from the initial point of view around customer initiatives to the final blueprint as a base for SAP implementation

Drive architecture governance and methodologies to ensure consistency, communication and cooperation across the R2R domain of architecture

Partake in the customer engagement lifecycle, and act as an integral member of the account engagement team

Define and integrate business, data, application and the technical R2R architecture domain

Lead/support the target architecture & customer roadmap development and maintain alignment with SAP solutions

Proactively introduce innovation topics to solve specific customer needs

Stay up to date about R2R improvement trends and the actual SAP portfolio of related solutions to formulate a customer roadmap

Estimate work efforts relating to the R2R process and related organizational design improvement, SAP technical configuration and development

Requirements

Ability to identify R2R-related business opportunities and solution gaps, as well as develop gap closure options

Capability to present SAP features and innovations filtered and focused on potential customer needs related to the R2R domain

Experience in R2R business architecture development with knowledge of related business processes, SAP solutions and delivery methodology

Understanding of SAP S/4HANA (Finance, Controlling) functionality

High-level understanding of budgeting and S&OP processes, cost allocation methods and fast closing approaches

Ability to align and effectively communicate with customer IT and business organizations

Nice to have

High-level understanding of products capabilities, functionality, and technologies of SAP S/4HANA (Logistics), CFin, PaPM, BPC, IBP and related deployment options

High-level understanding of GAAP and IFRS accounting processes and principles

Knowledge of sales process cycle, account and go-to-market planning in IT service sales

Expertise in frameworks: PMP, SAP Architectural and Design Thinking and TOGAF
