

Senior Android Developer - Freelancer

[Apply Now](#)

Company: Nomtek

Location: Poland

Category: computer-and-mathematical

Job description

Nomtek is a dynamic and innovative software development agency dedicated to creating cutting-edge web, mobile, and XR applications in a short time-to-market setup. Specializing in full-cycle product development, we put business outcomes first. Working with forward-thinking brands, we create people-centered experiences and help companies acquire new customers and showcase product capabilities.

We're currently in search of a skilled Android Developer to join our team as **a freelancer for a long-term cooperation** and make a valuable contribution to our continued achievements. If you're passionate about developing high-performance, scalable, and secure applications, we want to hear from you.

Location Poland Hours Full Time Salary Technologies Android •

Role & responsibilities_

Collaborate with a product owner, scrum master, testers, and other developers to understand project requirements and contribute to the overall app design

Develop and maintain Android applications, ensuring they are robust, responsive, and optimized for performance

Write clean, efficient, and maintainable code following best practices and coding standards

Debug and resolve issues, and performance bottlenecks within them Android applications

Stay up-to-date with the latest Android development trends, tools, and technologies

Optimize applications for different Android devices and versions

Ensure the security of our Android applications by implementing best security practices and addressing vulnerabilities

Collaborate with QA engineers to conduct thorough testing and ensure the quality of the apps

Continuously improve the user experience by identifying and implementing UI/UX enhancements

Requirements_

Proven experience in Android app development, with a strong portfolio of published apps

Proficiency in Kotlin programming language, clean architecture and MVVMi

Solid understanding of the Android SDK, Android Studio, and the Android development ecosystem

Experience with RESTful APIs and web services integration

Familiarity with Git or other version control systems

Proficiency in using following libraries: **Koin, Coroutines, Room, Retrofit**

Knowledge of agile development methodologies is a plus

English level min. B2, preferably C1; fluency in Polish language

Soft skills_

Excellent communication and teamwork skills

Being an empathetic team player, open to giving and receiving feedback, and understanding that team results are something more than individual performance

Self-organization and priorities management, a strong sense of ownership

Growth mindset - passion for gaining knowledge, experimenting, and learning from your mistakes

Passion for technology, innovation, and staying up-to-date with industry trends

Our Offer

Opportunity to explore new ideas, technologies, and approaches to solving complex problems, allowing you to continuously learn and grow in your role

Collaborative and inclusive work environment. We are proud to have a true flat structure

Company culture which empowers you to take initiative and make a difference within the organization

Flexible working hours and a possibility to work remotely

B2B contract

Perks & benefits_

Remote work

Flexibility
