About the Team

App Foundations team is about to abstract the client platform-level complexities and enable feature teams to achieve fast, immersive application rollouts across all major devices. Team is caring about performance, scalability, architecture, capabilities, reliability, observability and stability of our platform and application all across the different teams and devices. We're looking for software developers in Android who has rich experience and a good understanding of the Android platform, excited to design and implement features for our Android application. As a software development engineer, you'll be responsible for implementing various features and improving the stability of our application. While our reach till now has been impressive, we are looking for technical & product-aware engineers individuals who will define the future architecture of our platform, providing technical and product expertise, mentor and guide developers. Come and be a part of our high-performance Android team which is heavily focused on delivering an unmatched user delight! The position initiates with **fixed term contract for a period of six months**, which upon

completion, becomes an indefinite contract that requires a notice period of three months.

The pace of our growth is incredible – if you want to tackle hard and interesting problems at scale, and create an impact within an entrepreneurial environment, join us!

Your Key Responsibilities:

You will influence how we build individual features and products, and bring in best practices and patterns that can be used for engineering lifecycle for Android discipline

You'll take ownership of our continued efforts to scale mobile app development across Engineering, providing valuable insight on how we can refine our processes and tools to support additional contributors in our architecture and code

Drive feature development for our well-renowned apps for smartphones, tablets and Android TVs

Take ownership of end-to-end product quality, from developing to maintaining core app frameworks that help make the apps more reliable and delightful

Create prototypes of new ideas and explore new technologies on the forefront of mobile technology

What to Bring

Bachelor degree in Computer Science or related discipline preferred.

3-5 years of experience in Android mobile applications development with sound understanding of Android

Architecture, Framework, Android SDK, Core Java, Android Studio IDE, Android Debugger

Hands-on experience in building mobile applications and mobility solutions – native applications using Kotlin

Expert in UI components & controls; Action Bars, Widgets, Fragments etc.

Expert in basic components of Android: Activity, Services, Intent, Broadcast Receiver, Content Provider

Good working experience on Web Service Integration (REST, JSON, XML) & cloud technologies - AWS, GAE, GCM

Broad knowledge of a range of mobility areas such as Enterprise mobility, Mobile applications pertaining to various domains like Retail, VAS, Media, BFSI, Healthcare, Social Networking, E-commerce etc.

Experience in using analytics, location and social APIs, MDM, payment gateway, SMS

gateway, media content transcoding and cloud integration, APM tools
