

Senior Automation Test Engineer (JavaScript, Cypress) (#58)

[Apply Now](#)

Company: N-iX

Location: Poland

Category: computer-and-mathematical

Work type:Office/Remote **Technical Level:** Senior **Job Category:** Quality Control **Project:**

Pioneer of RBx solutions

We are looking for a skilled **Senior Automation QA Engineer** to join our engineering team.

You will be responsible for test automation implementation and maintenance end-to-end testing, as well as contribute to test automation strategy for the project. We expect that the best suitable candidate is ready to face challenges, take part in solution making and handle tasks independently while working as a part of the team.

Our client is a cutting-edge, technology focused company that provides a better way of detecting and managing risks that may impact the outcome of clinical trials. Their solutions, all of which are cloud-based, are driven by a unique set of algorithms that interrogate clinical and operational data in real-time centrally to conveniently illuminate outliers and anomalies in data.

Responsibilities:

Taking care of the test automation framework and tooling for your team

Driving manual testing debt reduction process in the team

Overseeing the execution of test batches for the components in scope

Supporting UAT/Regression phase execution for release validation

Identifying, documenting and tracking issues

Working on the continuous integration of the test scripts and driving your Squad towards

continuous testing

Working closely with Software/Test Engineers and Product Managers across the project to understand the context and drive automation and testing to meet objectives

Promoting testing best practices (e.g. shift-left approach) within the organization and provide guidance and assistance to enable developers to test

Cooperating with fellow Automation Test Engineers to improve the tooling and frameworks.

Requirements:

Experience (3+ years) as a Test/QA Automation Engineer or SDET role

Hands-on experience with Cypress tool

Experience with SaaS in a B2B heavily regulated environment (telco, banking, pharma) using Kubernetes, Docker

Experience with building/maintaining CI/CD pipelines with the tools like GitLab, Jenkins

Experience in programming with scripting languages like Python (preferably), Ansible or Bash

Experience with Test Management Tools like Zephyr, Xray or similar

Experience with working in an Agile/Scrum development process

Excellent knowledge of English, both spoken and written

We offer:

Flexible working format - remote, office-based or flexible

A competitive salary and good compensation package

Personalized career growth

Professional development tools (mentorship program, tech talks and trainings, centers of excellence, and more)

Active tech communities with regular knowledge sharing

Education reimbursement

Paid vacation days, sick leaves, and days off

Healthcare & Sport program

Medical insurance

Memorable anniversary presents

Corporate events and team buildings
