## Senior Biostatistician (Contractor Poland)

[Apply Now](#)

Company: Premier Research

Location: Poland

Category: computer-and-mathematical

### Description

Position at Premier Research Premier Research is looking for a **Senior Biostatistician** to join our **Statistics** team. You will help biotech, medtech, and specialty pharma companies transform life-changing ideas and breakthrough science into new medicines, devices, and diagnostics. What we do is profoundly connected to saving and improving lives, and we recognize our team members are the most valuable asset in delivering success.

**We are Built for You.** We are here to help you grow, to give you the skills and opportunities to excel at work with the flexibility and balance your life requires.

**We are Built by You.** Your ideas influence the way we work, and your voice matters here.

**We are Built with You.** As an essential part of our team, you help us deliver the medical innovation that patients are desperate for.

Together, we are Built for BiotechSM. **Join us and build your future here.**

### What you'll be doing:

Independently utilize your respected expertise to provide statistical consulting

Prepare statistical sections of protocols, performing sample size and power calculation for studies, and create randomization schedule per study design and relevant specifications

Review protocols, case report forms (CRFs), data management plans, data specifications and other related study documents

Develop statistical analysis plans (SAP) in accordance with the protocols and SAS programs to create statistical models and complete statistical analyses

Support integrated summaries of safety and efficacy (ISS and ISE) for regulatory submissions

Independently prepare analysis data specifications

Develop SAS programs to create derived variables and analysis data sets and computer programs to generate listings, tables, and graphs using SAS

Perform quality control of analysis data and TLGs

Review and provide input in interpreting analysis result to clinical study report

### **What we are searching for:**

Advanced degree (MS or PhD, or equivalent) in statistics or closely related field along with 4-6 years (or 3-5 years for PhD) of direct experience of clinical trials design and regulatory knowledge and analysis with advanced SAS programming experience

Proven knowledge of CDISC standards and application of those standards to projects; demonstrated working knowledge of advanced SAS macro development and code generation/management algorithms

Ability to effectively communicate with others on the project team and in the department; strong interpersonal communication skills

Detail oriented, well organized with the ability to work on several projects simultaneously

Excellent team player, collaborative and maintains a positive, results-orientated work environment

Accountable, dependable and demonstrates strong commitment to the role

Is customer service focused in approach to work, both internally and externally

### **Why choose Premier Research?**

Premier Research is more than a company – it's a community of people that truly care about one another, about our clients, and about our mission of furthering research to improve

the lives of patients in critical need.

Our Values – We Aim High, We Work Together, We Stay Agile, We Get It Done, We Care – mirror the determination, flexibility and trust that our team embodies. As a Premier team member, you have the power to make an impact, regardless of job title and location.

Our dedication to biotech and specialty pharma is unlike any other. We provide our staff with innovative technologies and continuous learning opportunities so that they have the tools they need to be successful.

Because we are transforming life-changing ideas into new medical treatments for a diverse population, we require the perspectives of a diverse staff thinking creatively, challenging ideas, and solving complex problems fearlessly. Through a commitment to diversity, equity, inclusion, and empowerment, we create a community of belonging that welcomes differences, fuels innovation, and better connects us to the patients, physicians, and customers we serve. We hire people that add to our culture, then invest in developing skills and abilities. If you are excited about this role, but your past experiences do not perfectly align with the position as described, we encourage you to apply anyway. You may be exactly the right candidate for this role or others. #LI-KT1
