Apply Now

Company: Dotlinkers

Location: Poland

Category: architecture-and-engineering

Our client is an international leader in public cloud and edge computing, content delivery, hosting, and security solutions. They manage a global infrastructure designed to provide enterprise-level businesses with first-class edge and cloud-based services.

Currently, due to the extension of their CDN Team, they're looking for an experienced C Engineer to help them in the development of the Proxy Caching Server.

What you'll do:

Improve efficiency of our cache purge

Load clients settings instantly

Server more than 100k clients domains on one server

What you'll need:

About 4 years in Software development and at least 3 year of C

Understanding the internals of TCP

Practical experience with Nginx as a user (ideally you have looked through it's source code)

Ineterest in new protocols and like to read RFCs

Experience with Lua

Benefits:

Flexible type of contract

Flexible working hours

Paid holidays on B2B

Learning budgets and options
