Senior Cloud Security Architect

Apply Now

Company: Pegasystems

Location: Kraków

Category: computer-and-mathematical

Meet Our Team:

Are you ready to take your career to the next level? Do you crave the opportunity for interaction with senior and executive management, customers and architects while working for a company that is changing the way the world builds enterprise software? Cloud Security Architects at Pega work on many different challenging projects and have a wide array of responsibilities. Cloud Security Architects are working closely with other architects, engineers, and product managers to define the software architecture for new solutions and security processes associated with the cloud.

Picture Yourself at Pega:

The Cloud Security Architect will demonstrate a synergistic mixture of technology coupled with strategy, and function as a technical thought leader who expresses facts, thoughts and ideas in a clear, concise, convincing and organized manner, and who actively listens, absorbs, and comprehends contextual meaning and the intent. You will be close to technologies such as Trend, Tenable, Mend, Veracode, Netsparker, SD Elements, Splunk, Sailpoint, Okta as well with a wide variety of cloud technologies and providers like Kubernetes, AWS (e.g. Lambda, AWS WAF, Load balancers, EKS, VPC, Cognito, EC2, RDS, S3 and others), GCP (similar to AWS), Service Mesh, Opensearch, Cassandra, Kafka, Jenkins, MongoDB Atlas, Okta, Pega.

What You'll Do at Pega:

Work with product management to define, architect, prioritize, and deliver new software product features.

Create high-level architectural specifications, ensuring functionality, and integration with existing systems/platforms.

Generate conceptual/logical architectures, and risk assessments.

Work closely with internal and external customers to understand their needs and translate them into clearly defined requirements.

Evaluate new and emerging technologies and determine applicability to current and future projects and markets.

Create working prototypes of new cutting-edge product features and communicate the benefits to stakeholders and teams.

Initiate and lead formal and informal reviews of ideas and technical objectives – promote ideas and practices which drive innovation.

Communicate effectively with developers, product owners, Pegasystems leadership and others about project progress and risk, presenting alternative approaches and plans when appropriate.

Review and develop business strategy and technical architecture for integration with third party technologies.

Who You Are:

You are an experienced results-oriented security architect who thrives in a dynamic, collaborative, team-oriented, and cross-functional environment. You are able to rapidly pick up new required skills, and you are passionate about security and learning new technologies. You have excellent written and verbal communication skills and the ability to clearly explain complex business and technical topics to both technical and non-technical audiences.

What You've Accomplished:

Minimum 8 years of work experience, with ideally 4+ years of experience in designing software or security solutions as an Architect.

Practical experience within application and IT security.

Sound overview of security mechanisms and technologies of current cloud platforms incl.

concepts of securing cloud environments and applications, perimeter protection, cloud service provider security services.

Knowledge of current approaches for security testing (SAST, DAST, IAST, penetration testing).

Insight into established security and data protection standards like ISO 27001, GDPR and HIPAA security rules.

Experience managing or delivering product and/or projects to large-scale enterprises.

Knowledge of identity and access management incl. access policies, access to tools, concepts of MFA, SSO, SAML, IdP.

Nice to have qualifications:
Knowledge of Agile development methodologies such as SCRUM.

Advanced proficiency in Kubernetes platform, demonstrating a deep understanding of its architecture and components.

Good understanding of applications in clustered deployments and distributed systems.

Pega Offers You:
A highly collaborative environment for the designing and development of new ideas and features.

A culture where employees engage deeply, own outcomes and lead from the front.

Continuous learning and career opportunities – internal and external training opportunities, area for own initiatives, Rotation Program.

An inclusive, agile, and flexible work environment (you can use our DYI lab, volunteer, or do other great things with us).

Permanent agreement and benefits package (bonus incentive, employee equity in the company, Medical and Group Insurance, Multisport, English & Polish lessons, Employee Assistance Program, and that's not all).

Flexible work mode: remote/hybrid/office. Our modern office is located in Krakow (Bonarka4Business Center). We hope you will enjoy Pega relax/game rooms and

social/sport initiatives soon!
