

## Senior Data Analytics Engineer

[Apply Now](#)

Company: avenga

Location: Poland

Category: computer-and-mathematical

### **This is your mission**

Cooperation with Software Engineers to refine Transforms as a Service enabling consistent data transformations from the data lake into the data vault and data marts including validation and data governance utilizing dbt-cli

Daily work with new technologies like Snowflake (including Snowpark with Python), Google Cloud Platform, Airflow 2, dbt, Docker and Kubernetes

Support Analysts and Product Owners to build self service data products across a three tier user model

Work with Analysts to develop Self Service Analytics in Looker

Cooperation with Data Engineers to source and load new data sets as needed

Refine, develop and deliver data into the Data Vault with dbt-cli

Develop API Microservice Modules to deliver data real time to platform engineers

### **What you bring along**

Minimum 5 years of experience in analytics engineering or related roles, with a focus on developing complex transformations with dbt

You have experience developing data products from complex data sources.

You have experience with dbt (preferably dbt-cli)

You have experience programming with Python

Knowledge of GitHub or similar version control system, and understand how to utilize CI/CD with integration testing in an analytical environment.

You have worked with Cloud Databases: Snowflake, BigQuery, FireBolt, or Redshift

Experienced with Visualization tools (like Tableau, ThoughtSpot or Looker)

English C1

### **Your benefits**

Private medical care

Individual training budget

Cafeteria system

Psychological care

Sports plans and sports teams

Life insurance

Possibility to change the project

Dedicated income protection and third-party liability insurance for IT professionals

Opportunity to develop competencies in Competence Centers

Team-building events

Support in day-to-day work (in project-related topics and administrative/HR matters)
