

Senior Data Engineer (Data Competency Center)

[Apply Now](#)

Company: Sigma Software

Location: Poland

Category: computer-and-mathematical

Overview

Required skills

Python/Scala / expert Data Engineering / expert ETL/ELT expertise / strong Cloud data processing / strong CI/CD in data engineering / strong

Unleash your ambition as a Senior Data Engineer!

We are looking for a professional who not only has strong expertise in data engineering but is also ready to take on a driver role, contributing to our Data Competency Center within Sigma Software. The role will involve Solution assessment, pre-sales activities under supervision, architecture design composition, and more. We seek someone passionate about data processing who strongly desires to grow their skills and expertise in this field.

Join us at Sigma Software to be at the forefront of the most interesting projects and play a pivotal role in our Competence Center's growth and success.

Project

While regularly getting new opportunities, we currently don't have enough people to process them. Thus, we are looking for someone to extend the Data Competency team to support the pre-sales processes and get involved in the project. As a Data Engineer joining BU003 Data Competency Center, you will play a pivotal role in shaping and driving its endeavors.

Requirements

Requirements

Pre-sales collaboration: Collaborating with solution architects, project managers, and business analysts to gather requirements, perform investigations, and provide estimations for

potential projects

Project initiation: Taking the lead in driving new projects and being a key driver in their success

Project execution: Becoming a part of the team for one of the opportunities in the pipeline, fulfilling the Data Engineer role

Contributing to and spearheading Data Engineering excellence: Researching technology trends and conducting best practices analysis to ensure our solutions remain state-of-the-art

Responsibilities

Responsibilities

Proficiency in building, maintaining, testing, and delivering large-scale data pipelines

ETL/ELT expertise: Practical experience with at least one end-to-end solution and its start, development, and maintenance.

Proficiency in working with large data extraction, aggregation, and manipulation using a selected database. Experience and strong knowledge of SQL and NoSQL databases.

Understanding the pros and cons of different types of databases, experience in data modeling, and database optimizations

At least 3-5 years of proficiency in Python or Scala for data processing and transformation

Hands-on experience with main frameworks and libraries in Data Engineering domains: Spark, Hive, Kafka, Airflow, Flink, etc., with a proven record of debugging and optimization experience

Experience with CI/CD in data engineering

Experience with cloud-based data processing solutions

WILL BE A PLUS:

Knowledge of K8s orchestrations

Exposure to OLAP tools like Tableau, Qlik, Grafana, or similar

Databricks experience/certification
