

## Senior Embedded Engineer

[Apply Now](#)

Company: Devire

Location: Kraków

Category: computer-and-mathematical

### Your future company

For my Client, an international company based in Krakow, I am looking for an Senior Embedded Engineer.

If you have a minimum of 5 years of experience with C++, have worked with embedded systems and use English on a daily basis, I invite you to familiarize yourself with the details of the offer.

We are looking for candidates for positions at the Senior or Lead levels.

### Requirements

Master's Degree in Computer Science or related engineering discipline or work experience in lieu of degree

More than 5 years of experience in Embedded Software Engineering

Experience in C++

Experience in scripting languages, e.g. Python

Experience with Linux

Knowledge and hands-on experience with embedded systems: hardware-software related, RTOS, development toolchains, communication protocol, microcontrollers

Debugging skills

Experience with version control systems (Git)

Experience with creating Unit Tests will be a plus

Awareness of the end-to-end software development lifecycle

Very good oral and written communication skills in English (B2/C1)

Willingness to travel to other locations

### **Responsibilities**

Design and implement software for our subsea products

Initially write unit tests for existing code, debug and fix found issues

Implement functionality to allow HIL testing, i.e. test modes, trigger faults

Implement new drivers, protocol stacks etc.

### **The offer**

Opportunity to be involved in international projects for a leading oil and gas companies

Challenges and personal development

Varied and interesting work tasks in an inspiring, international engineering environment

Competitive salary and a package of benefits

Relocation package

An informal and stimulating work environment with a high professional standard
