Project ID

Project Overview:

Join our team as we work on a cross-border credit risk management initiative. We aim to improve data quality and reduce manual efforts using technologies like DataStage, IBM MDM, and Java to create a comprehensive solution for the entire group.

Responsibilities:

Collaborate as a key member of a newly formed Scrum team operating within the SAFe framework.

Develop solutions using DataStage to bolster our credit risk management domain.

Implement and optimize solutions for data pre-population to enhance data quality and reduce manual efforts.

Contribute to creating a robust system utilized for credit processes, limit allocation, internal and external reporting, and customer service.

Requirements:

Extensive development knowledge with IBM MDM

Knowledge of SQL, Unix, Linux, and IBM CDC.

Other technologies: IBM MDM, PL/SQL, Unix/Linux, IBM CDC, Windows, Jira.

Test Driven Development (TDD) experience.

Agile mindset, Scrum values, and preferably, SAFe experience.

WE OFFER:

Interesting and stable development projects and long-term cooperation.

Attractive remuneration in the B2B model depends on competencies and experience.

Co-financing of private medical care (Medicover) and Multisport card.

Occasional company integration meetings.

Referral program.

emagine mobile application – easy reporting of working time, quick access to new offers.
