Company: Dotlinkers

Location: Poland

Category: computer-and-mathematical

Are you into sports? Good that you're here then! Our Client is making a new kind of Sales Software and CRM for Gyms. Their beta version is already being used by some of the European brands. Their goal is to help gyms grow their revenue by better serving their customers. To do so, their software allows gyms to create an ultra-personalized experience for their members and potential clients.

The startup raised funds from private investors and won an EU innovation prize. The team you will be joining is multi-cultural with its office in Gdansk by the Polish seaside.

Are you a customer support athlete, who rises to the challenges? Great! See the details below:

Company culture:

We are all about learning from the field, alongside our clients and users.

We value all opinions to create the best solution possible.

We are our clients' greatest supporters.

We are tech athletes who rise to the challenges

Your role:

As the Senior Front-end engineer, your role will be to build from the ground up the software leveraging the experience acquired by the Beta, which is currently being used.

Architecture & implementation of the web application Exciting team collaboration to build a consistent, most cost-effective & responsive application Clean & readable code Being in

direct contact with our clients for conception and training purposes If you want, you may travel to various European locations to understand gym staff workflows

Your profile:

5 years experience React (Typescript)

Multiple Projects using GraphQL, PostgreSQL.

Agile Methodology & Continuous Delivery

Love to learn with the ability to learn fast

Creative and coming -up with new ideas

Customer / end-user obsession (yes, obsession is the right word)

You enjoy working within a startup environment

It would be awesome if you were familiar with:

Serverless

Multi-platform project (React+React Native)

Additional European language fluency
